Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB–2, *International Energy: Subject Thesaurus.* In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. *See also* references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

Report of the second research co-ordination meeting on the co-ordinated research programme: rapid instrumental and separation methods for monitoring radionuclides in food and environmental samples, 18:6099 (R;XA)

ADENINES
Bio-organic molecules on surfaces: Atomic structure of ordered monolayers of adenine on graphite by scanning tunneling microscopy and analysis of sperm nuclear volumes by atomic force microscopy, 18:6118 (RA;US)

ADHESIVES
Epoxy adhesive with high fracture toughness, 18:6079 (RA;US)

ADSORBENTS
Enhanced durability of high-temperature desulfurization sorbents for fluidized-bed applications, 18:4859 (R;US)
Integration and testing of hot desulfurization and entrained flow gasification for power generation systems, 18:4855 (R;US)

ADU
A continuous reactor system for precipitation of uranium from uranyl solution, 18:5101 (IA;IN)
Precipitation of ammonium diuranate : a study, 18:5052 (IA;IN)
Preparation of metal grade uranium trioxide through ammonium diuranate precipitation route, 18:5050 (IA;IN)

ADVANCED LIGHT SOURCE
Broad-band characteristics of circular button pickups, 18:6349 (R;US)
XUV synchrotron optical components for the Advanced Light Source: Summary of the requirements and the developmental program, 18:6353 (R;US)

ADVANCED PHOTON SOURCE
Absorption of undulator radiation in media, 18:6319 (R;US)
Design and initial tests of beam current monitoring systems for the APS transport lines, 18:6309 (R;US)
Fluorescent screens and image processing for the APS linac test stand, 18:6311 (R;US)
High-energy resolution, high-angular acceptance crystal monochromator, 18:6318 (R;US)
Liquid metal cooling of synchrotron optics, 18:6313 (R;US)
Preliminary design of the beam loss monitor system for the Advanced Photon Source, 18:6308 (R;US)
Simulation of U-5 prototype undulator effects on the beam dynamics, 18:6312 (R;US)
Test results of a monopulse beam position monitor for the Advanced Photon Source, 18:6310 (R;US)
The APS linac beam position monitors and electronics, 18:6307 (R;US)
Thermal, structural, and fabrication aspects of diamond windows for high power synchrotron x-ray beamlines, 18:6320 (R;US)

AERODYNAMICS

Accuracy
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5870 (IA;JP;In Japanese)

Aspect Ratio
Examples of application of gas turbine reltated numerical analysis at the current stage and its problems.: Aerodynamic design system for turbine cascades, 18:5882 (IA;JP;In Japanese)

Boundary Layers
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5870 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental vertification of turbine cascades, 18:5883 (IA;JP;In Japanese)

Computer Codes
Examples of application of gas turbine reltated numerical analysis at the current stage and its problems.: Aerodynamic design system for turbine cascades, 18:5882 (IA;JP;In Japanese)

Computerized Simulation
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of turbine cascade, 18:5871 (IA;JP;In Japanese)

Experimental Data
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of turbine cascade, 18:5871 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental verification of turbine cascades, 18:5881 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental vertification of turbine cascades, 18:5883 (IA;JP;In Japanese)
Examples of application of gas turbine reltated numerical analysis at the current stage and its problems.: Aerodynamic design system for turbine cascades, 18:5882 (IA;JP;In Japanese)

Fluid Flow
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of turbine cascade, 18:5871 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Comparison and application of cascade aerodynamic analytic methods, 18:5880 (IA;JP;In Japanese)

Interactive Display Devices
Examples of application of gas turbine reltated numerical analysis at the current stage and its problems.: Aerodynamic design system for turbine cascades, 18:5882 (IA;JP;In Japanese)

Numerical Analysis
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5870 (IA;JP;In Japanese)
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of turbine cascade, 18:5871 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental vertification of turbine cascades, 18:5883 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental verification of turbine cascades, 18:5881 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Comparison and application of cascade aerodynamic analytic methods, 18:5880 (IA;JP;In Japanese)

Pulsations
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Comparison and application of cascade aerodynamic analytic methods, 18:5880 (IA;JP;In Japanese)

Shock Waves
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5870 (IA;JP;In Japanese)

Simulation
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of turbine cascade, 18:5871 (IA;JP;In Japanese)

Steady Flow
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Comparison and application of cascade aerodynamic analytic methods, 18:5880 (IA;JP;In Japanese)

Turbulent Flow
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Comparison and application of cascade aerodynamic analytic methods, 18:5880 (IA;JP;In Japanese)

Unsteady Flow
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of turbine cascade, 18:5871 (IA;JP;In Japanese)

Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Comparison and application of cascade aerodynamic analytic methods, 18:5880 (IA;JP;In Japanese)

Verification
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental verification of turbine cascades, 18:5881 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental vertification of turbine cascades, 18:5883 (IA;JP;In Japanese)
Examples of application of gas turbine reltated numerical analysis at the current stage and its problems.: Aerodynamic design system for turbine cascades, 18:5882 (IA;JP;In Japanese)

Viscosity
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5870 (IA;JP;In Japanese)

AEROSOLS
Application of boundary element techniques to the motion of aerosol particles, 18:6847 (R;US)
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering: Final technical report, 18:6093 (R;US)
Chemical and physical conversion in cold atmosphere and the effect of radiation, 18:6541 (RA;FI)
Pulsed electron beam precharger: Technical progress report No. 10, December 1, 1991–February 29, 1992, 18:5369 (R;US)
Pulsed electron beam precharger: Technical progress report No. 5, September 1–November 30, 1990, 18:5364 (R;US)
Pulsed electron beam precharger: Technical progress report No. 6, December 1, 1990–February 28, 1991, 18:5365 (R;US)
Pulsed electron beam precharger: Technical progress report No. 7, March 1–May 31, 1991, 18:5366 (R;US)

AGRICULTURAL RESIDUES
See AGRICULTURAL WASTES

AGRICULTURAL WASTES
Enhancement of broiler litter to improve the fertilizer quality of litter, 18:5831 (R;US)

AGRICULTURE
Application of solar heat in farming, 18:5814 (IA;DE;In German)
Information about the CENA: Agriculture Nuclear Energy Center, 18:6656 (I;BR;In Portuguese)

AIR
Development of a reference method and sampling system for continuous monitoring of environmental HT and HTO concentration in the air: Final report for the period 15 December 1988 - 14 December 1990, 18:6498 (R;XA)
Effect of Pb and air absorber thickness on ^{137}Cs signal, 18:6378 (R;US)
Hanford Environmental Dose Reconstruction Project: Monthly report, 18:6697 (R;US)

AIR CONDITIONERS
The Oklahoma Field Test: Air-conditioning electricity savings from standard energy conservation measures, radiant barriers, and high-efficiency window air conditioners, 18:5803 (R;US)

AIR INFILTRATION
Risk analysis of air infiltration in the building, 18:5771 (RA;DK)

AIR POLLUTION

Acidification
Contribution to the quantitative comprehension of damage to spruce stands in polluted air, 18:6762 (RA;DE;In German)

Air Pollution Abatement
7th status colloquium of PEF on March 5 to 7, 1991 at Karlsruhe Nuclear Research Center. Summarizing reviews of the project management, 18:6523 (R;DE;In German)

Air-Biosphere Interactions
7th status colloquium of PEF on March 5 to 7, 1991 at Karlsruhe Nuclear Research Center. Summarizing reviews of the project management, 18:6523 (R;DE;In German)

Asthma
Effects of air pollution on spirometric parameters, bronchial hyperreactivity and risk and course of illness, 18:6772 (RA;DE;In German)

Biological Effects
Biochemical changes in the metabolism of beech trees caused by injury - the role of phytoalexines as a forest decline symptom, 18:6763 (RA;DE;In German)
Biological effects of air pollution resulting from the combustion of coal, 18:4968 (I;NL)
Effects of air pollution on spirometric parameters, bronchial hyperreactivity and risk and course of illness, 18:6772 (RA;DE;In German)
Effects of soil acidification on the physiology of sessile oak trees, 18:6738 (RA;DE)
Prevention and alleviation of air pollution induced forest damage through soil amelioration, 18:6548 (RA;FI)
Reactions of trees to air pollutants, 18:6735 (RA;DE)
Response of northern forest plants to the pressure of air pollution and climatic change, 18:6710 (RA;FI)
Sorption properties and permeability of cuticles for monoterpenes with special consideration of the influence of gaseous pollutants on spruce, 18:6765 (RA;DE;In German)

Biological Indicators
Secondary metabolism of spruce and pine as an indicator for damage in different altitudes in the 'Wank' (Bavarian Alps), 18:6749 (RA;DE;In German)

Carcinogenesis
In vivo and in vitro studies on carcinogenic, toxic and genotoxic activities of air pollutants (SO_2, NO_x, PAH, N-nitroso compounds, separately and in combination). Pt. 6, 18:6771 (RA;DE;In German)

Chlorophyll
Effects of soil acidification on the physiology of sessile oak trees, 18:6738 (RA;DE)

Detoxification
Contribution to the quantitative comprehension of damage to spruce stands in polluted air, 18:6762 (RA;DE;In German)
Reactions of trees to air pollutants, 18:6735 (RA;DE)
Secondary metabolism of spruce and pine as an indicator for damage in different altitudes in the 'Wank' (Bavarian Alps), 18:6749 (RA;DE;In German)
Uptake and detoxification of chlorinated hydrocarbons by the needles of spruces, 18:6748 (RA;DE;In German)

Diffusion
Dry deposition and uptake of air pollutants by the cuticles of plants, 18:6766 (RA;DE;In German)

Environmental Effects
Evaluation of forest damage in the research area 'Wank' in the Bavarian Alps in 1987-1990, 18:6743 (RA;DE;In German)
Ion fluxes in spruce (Picea abies, [L.] Karst.) and beech tree (Fagus sylvatica, L.) ecosystems of the inner Bavarian Forest (National Park Bavarian Forest) with special regard to higher altitudes, 18:6755 (RA;DE;In German)
Natural C- and N-isotope ratios in different compartments of damaged and healthy spruce forests, 18:6753 (RA;DE;In German)
Project 'altidudinal gradient Zillertal' in the Tyrol, 18:6494 (RA;DE;In German)
Research into the causes of oak decay in Hungary, 18:6724 (RA;DE)
Second status seminar of the 'Bavarian Project Group on Research into the Effect of Environmental Pollutants (PBWU)' on the major research area 'forest decline'. Proceedings, 18:6741 (R;DE;In German)
Structural materials, 18:6546 (RA;FI)

Environmental Transport
7th status colloquium of PEF on March 5 to 7, 1991 at Karlsruhe Nuclear Research Center. Summarizing reviews of the project management, 18:6523 (R;DE;In German)

Forests
Deposition, conversion and effect of air pollutants in mountain forest ecosystems of the Alpine region. Concept of research

in the Calcareous Alps (Wank/Kramer near Garmisch-Partenkirchen), a main area of research of PBWU, 18:6742 (RA;DE;In German)
Second status seminar of the 'Bavarian Project Group on Research into the Effect of Environmental Pollutants (PBWU)' on the major research area 'forest decline'. Proceedings, 18:6741 (R;DE;In German)

Genetic Effects
Development of an assay to detect toxic and genetoxic effects in cells of the respiratory tract: Analysis of multiple parameters after exposure to heavy metals, 18:6779 (RA;DE;In German)

Leaves
Biochemical changes in the metabolism of beech trees caused by injury - the role of phytoalexines as a forest decline symptom, 18:6763 (RA;DE;In German)
Contribution to the quantitative comprehension of damage to spruce stands in polluted air, 18:6762 (RA;DE;In German)
Dry deposition and uptake of air pollutants by the cuticles of plants, 18:6766 (RA;DE;In German)
Effects of air pollutants on leaves, 18:6761 (RA;DE;In German)
Ion fluxes in spruce (Picea abies, [L.] Karst.) and beech tree (Fagus sylvatica, L.) ecosystems of the inner Bavarian Forest (National Park Bavarian Forest) with special regard to higher altitudes, 18:6755 (RA;DE;In German)

Levels
Project 'altidudinal gradient Zillertal' in the Tyrol, 18:6494 (RA;DE;In German)

Morphological Changes
Deposition, conversion and effect of air pollutants in mountain forest ecosystems of the Alpine region. Concept of research in the Calcareous Alps (Wank/Kramer near Garmisch-Partenkirchen), a main area of research of PBWU, 18:6742 (RA;DE;In German)

Oaks
Effects of soil acidification on the physiology of sessile oak trees, 18:6738 (RA;DE)
Research into the causes of oak decay in Hungary, 18:6724 (RA;DE)

Ozone
Secondary metabolism of spruce and pine as an indicator for damage in different altitudes in the 'Wank' (Bavarian Alps), 18:6749 (RA;DE;In German)

Photosynthesis
Reduction of stomatal control capacity by air pollutants, 18:6746 (RA;DE;In German)
The influence of gaseous hydroperoxides on photosynthesis in spruce (Picea abies), 18:6759 (RA;DE;In German)

Pollution Sources
Characterization of anthropogenic dusts in ambient air at typical sites in Baden-Wuerttemberg, distribution with respect to time and space of selected toxic and cancerogenic dust components, 18:6506 (RA;DE;In German)

Respiratory System Diseases
Effects of air pollutants on juvenile risk groups, 18:6773 (RA;DE;In German)

Seasonal Variations
Characterization of anthropogenic dusts in ambient air at typical sites in Baden-Wuerttemberg, distribution with respect to time and space of selected toxic and cancerogenic dust components, 18:6506 (RA;DE;In German)

Soils
Ion fluxes in spruce (Picea abies, [L.] Karst.) and beech tree (Fagus sylvatica, L.) ecosystems of the inner Bavarian Forest (National Park Bavarian Forest) with special regard to higher altitudes, 18:6755 (RA;DE;In German)

Spruces
Natural C- and N-isotope ratios in different compartments of damaged and healthy spruce forests, 18:6753 (RA;DE;In German)
Sorption properties and permeability of cuticles for monoterpenes with special consideration of the influence of gaseous pollutants on spruce, 18:6765 (RA;DE;In German)
The influence of gaseous hydroperoxides on photosynthesis in spruce (Picea abies), 18:6759 (RA;DE;In German)
Uptake and detoxification of chlorinated hydrocarbons by the needles of spruces, 18:6748 (RA;DE;In German)

Stratosphere
Global research of atmospheric pollutants, 18:6544 (RA;FI)

Teratogenesis
In vivo and in vitro studies on carcinogenic, toxic and genotoxic activities of air pollutants (SO_2, NO_x, PAH, N-nitroso compounds, separately and in combination). Pt. 6, 18:6771 (RA;DE;In German)

Topography
Deposition, conversion and effect of air pollutants in mountain forest ecosystems of the Alpine region. Concept of research in the Calcareous Alps (Wank/Kramer near Garmisch-Partenkirchen), a main area of research of PBWU, 18:6742 (RA;DE;In German)

Toxicity
Development of an assay to detect toxic and genetoxic effects in cells of the respiratory tract: Analysis of multiple parameters after exposure to heavy metals, 18:6779 (RA;DE;In German)
In vivo and in vitro studies on carcinogenic, toxic and genotoxic activities of air pollutants (SO_2, NO_x, PAH, N-nitroso compounds, separately and in combination). Pt. 6, 18:6771 (RA;DE;In German)

Trees
Reactions of trees to air pollutants, 18:6735 (RA;DE)
Second status seminar of the 'Bavarian Project Group on Research into the Effect of Environmental Pollutants (PBWU)' on the major research area 'forest decline'. Proceedings, 18:6741 (R;DE;In German)

Water Use
Reduction of stomatal control capacity by air pollutants, 18:6746 (RA;DE;In German)

AIR POLLUTION ABATEMENT
7. status colloquium of the PEF project on March 5-7, 1991 at Karlsruhe Nuclear Research Center, 18:6505 (R;DE;In German)
Abatement of energy-related CO_2 emissions in the Federal Republic of Germany. Resolution of the German Federal Government on the abatement of energy-related CO_2 emissions in the Federal Republic of Germany based on the Second Intermediate Report of the Interministerial Study Group 'CO_2 abatement' (IMA CO... 18:5699 (I;DE;In German)
Better air: How should Denmark prioritize initiatives aimed at an improvement of the atmospheric environment? Final document and presentation from the experts at the consensual conference, 18:5707 (R;DK;In Danish)
Costs of CO_2 reduction technologies for the Netherlands, 18:6475 (R;NL)
Development of a decision support system for emission reduction and emission control technologies, 18:6521 (RA;DE;In German)
Efficient strategies of reduction in immissions. Pt. 1. Calculation of emission scenarios and assessment of immissions, 18:6522 (RA;DE;In German)
Federal Government decision on the reduction of CO_2-emissions in the Federal Republic of Germany until 2005, 18:5697 (I;DE;In German)
UNEP greenhouse gas abatement costing studies: Analysis of abatement costing issues and preparation of a methodology to undertake national greenhouse gas abatement costing studies. Phase one report, 18:5711 (R;DK)

AIR POLLUTION CONTROL
Report from a Nordic expert meeting on cost-effective international agreements on air pollution control, 18:5715 (R;NO)

AIR POLLUTION MONITORING
The OML meteorological preprocessor, 18:6529 (R;DK)

AIR QUALITY
Mexico City air quality: Progress of an international collaborative project to define air quality management options, 18:6525 (R;US)

AIR-BIOSPHERE INTERACTIONS
Second status seminar of the 'Bavarian Project Group on Research into the Effect of Environmental Pollutants (PBWU)' on the major research area 'forest decline'. Proceedings, 18:6741 (R;DE;In German)

ALPHA REACTIONS
Investigation of the $^{9}Be(a,n)^{12}C$ reaction. Pt. 2. Differential cross sections for E_a=7.02-15.70 MeV and $E_{ex}(^{12}C)$=0.0, 4.439, 7.654, 9.641, 10.84, 11.83 and 12.71 MeV, 18:7024 (R;DE)
Screened Rutherford backscattering cross section for heavy ion and low energy backscattering analysis, 18:7027 (R;US)

ALPHA-BEARING WASTES
The role of the observational approach in RI planning: WAG 5 case study, 18:5127 (R;US)
User's reference manual for CAMCON: Compliance Assessment Methodology Controller: Version 3.0, 18:5171 (R;US)

ALS STORAGE RING
See ADVANCED LIGHT SOURCE

ALUMINATES
Tritium permeation scoping experiments: LWR Tritium Target Development Program, 18:5597 (R;US)

ALUMINIA
See ALUMINIUM OXIDES

ALUMINIUM
Aluminium Alloys
Aluminium and copper analysis in metallic alloys by neutron activation analysis from an ^{241} Am-Be source, 18:6101 (I;BR;In Portuguese)

Atom Collisions
Bremsstrahlung induced by 50 MeV H^0 bombardment, 18:7117 (RA;US)

Charged-Particle Transport
Bremsstrahlung induced by 50 MeV H^0 bombardment, 18:7117 (RA;US)
Interaction of low-energy electrons and positrons with condensed matter: Stopping powers and inelastic mean free paths from optical data, 18:7119 (RA;US)
Secondary electron emission with molecular projectiles, 18:7115 (RA;US)
Stopping power for protons in Al for the whole range of velocities, 18:7036 (RA;US)

Desorption
Laser-induced desorption of aluminum from $Al_2O_3(11\bar{2}0)$, 18:6170 (RA;US)

Electron-Atom Collisions
Cross sections for K-shell ionization by electron impact, 18:7062 (RA;US)

Electronic Structure
Electron Compton scattering in the electron microscope, 18:5925 (RA;US)
Positronium formation and photoemission spectroscopy for surface, 18:5927 (RA;US)

Fuel Plates
Characterization of commercially pure aluminum powder for research reactor fuel plates, 18:5489 (R;US)

Heating
Nuclear thermal rocket entry heating and thermal response preliminary analysis, 18:5658 (R;US)

Impact Tests
Hypervelocity impact tests and simulations of single Whipple bumper shield concepts at 10 km/s, 18:6250 (R;US)

Implosions
Nonlinear interaction of magnetohydrodynamic instabilities in radially imploded plasmas, 18:7214 (R;US)

Ion Implantation
Stopping power and ranges in ion implantation, 18:5926 (RA;US)

Neutron Activation Analysis
Aluminium and copper analysis in metallic alloys by neutron activation analysis from an ^{241} Am-Be source, 18:6101 (I;BR;In Portuguese)

Physical Radiation Effects
The morphology of collision cascades as a function of recoil energy, 18:7255 (RA;US)

Plasma Instability
Nonlinear interaction of magnetohydrodynamic instabilities in radially imploded plasmas, 18:7214 (R;US)

Positron Collisions
Inelastic positronium formation at metal surfaces, 18:7087 (RA;US)

Powders
Characterization of commercially pure aluminum powder for research reactor fuel plates, 18:5489 (R;US)

Production
Greenhouse effect and greenhouse warming potentials for CF_4 and C_2F_6, 18:6531 (R;NO)

Spectroscopy
Positronium formation and photoemission spectroscopy for surface, 18:5927 (RA;US)

Tunnel Effect
Dynamical effects in electron tunneling, 18:7100 (RA;US)

ALUMINIUM 27 TARGET
Charge correlations in the breakup of gold projectiles in reactions at E/A=600 MeV, 18:7002 (R;DE;In German)

ALUMINIUM ALLOYS
See also ALUMINIUM BASE ALLOYS
A first-principles study of phase stability in nickel-aluminum alloys, 18:6157 (RA;US)
A model for the formation of bands of ultrafine particles in rapidly solidified aluminum-beryllium alloys, 18:5993 (RA;US)
Desorption characteristics of the $LiAlO_2$-H_2O(g) system, 18:7284 (RA;US)
Dosimetry measurements for PNL experiments 12-14 in the Omega West Reactor, 18:7253 (RA;US)
Irradiation performance of oxide dispersion strengthened copper alloys to 150 dpa at 415C, 18:7318 (RA;US)
Microstructural evolution of neutron-irradiated Ni-Si and Ni-Al alloys, 18:7347 (RA;US)
Neutron-induced swelling of binary Ni-Al alloys, 18:7301 (RA;US)
Phase stability and electronic structure of transition-metal aluminides, 18:5930 (R;US)
Phase stability of fcc- and hcp-based intermetallics: The Ti-Al and Cd-Mg systems, 18:5975 (R;US)
Strain measurement in individual phases of an Al/TiC composite during mechanical loading, 18:6057 (R;US)
The behavior of intermetallic compounds at large plastic strains, 18:5972 (R;US)

ALUMINIUM BASE ALLOYS
Implications of neutron spectrum and flux differences on fission-fusion correlations at high neutron fluence, 18:7256 (RA;US)
Neutron irradiation effects on inelastic and mechanical properties in Al-Mg-Si alloys, 18:5957 (IA;AR)
The application of quality criteria for the prediction of porosity in the design of casting processes, 18:5934 (R;US)

ALUMINIUM FLUORIDES
Elimination of scattering centers from $Cr:LiCaAlF_6$, 18:6077 (RA;US)

ALUMINIUM NITRIDES
Observation of radiation-induced changes in dielectric properties in ceramic insulators, 18:7367 (RA;US)

ALUMINIUM OXIDES
Brazing
The joining of alloys for fusion reactor applications - Brazing of copper-alumina alloys and the weldability of low-activation Fe-Cr-Mn-C steels, 18:7319 (RA;US)
Catalytic Effects
Aluminum coordination and active sites on aluminas, Y zeolites and pillared silicates: Progress report, January 31, 1992–January 31, 1993, 18:6047 (R;US)
Energy Absorption
Photon energy response of an aluminum oxide TLD environmental dosimeter, 18:6426 (R;US)
Gelation
Elaboration of catalysts with silica and silica-alumina matrices, 18:6143 (R;FR;In French)
Nondestructive Testing
Ceramic processing aided by millimeter-wave testing, 18:7287 (RA;US)
Permeability
Analysis of in-pile tritium release experiments, 18:7322 (RA;US)
Photochemical Reactions
Laser-induced desorption of aluminum from $Al_2O_3(11\bar{2}0)$, 18:6170 (RA;US)
Physical Radiation Effects
Anisotropic dislocation loop nucleation in ion-irradiated $MgAl_2O_4$, 18:7324 (RA;US)
Ceramic processing aided by millimeter-wave testing, 18:7287 (RA;US)
Dispersoid stability in a $Cu\text{-}Al_2O_3$ alloy under energetic cascade damage conditions, 18:7354 (RA;US)
In-situ measurement of radiation induced conductivity in ceramics, 18:7331 (RA;US)
Irradiation performance of Li_2O and $LiAlO_2$ under large temperature gradients, 18:7283 (RA;US)
Irradiation performance of oxide dispersion strengthened copper alloys to 150 dpa at 415C, 18:7318 (RA;US)
Observation of radiation-induced changes in dielectric properties in ceramic insulators, 18:7367 (RA;US)
Radiation-induced changes in the physical properties of ceramic materials, 18:7365 (RA;US)
Tensile property changes of metals and irradiated to low doses with fission, fusion and spallation neutrons, 18:7341 (RA;US)
The effect of displacive and ionizing radiation on the thermal conductivity of Al_2O_3, 18:7325 (RA;US)
The effect of phonon scattering by aluminum precipitates and voids on the thermal conductivity of Al_2O_3, 18:7369 (RA;US)
Production
Synthesis of nanocrystalline materials by electron beam evaporation, 18:5219 (R;US)
Sorptive Properties
Analysis of in-pile tritium release experiments, 18:7322 (RA;US)

BELGIUM
17 SEPTEMBRE 1991-Ministerial Order amending the Ministerial Order of 24 April 1964 on approval of a type of equipment containing radioactive substances, made in implementation of section 3.1.d/2 of the Royal Order of 28th February 1963 laying down general regulations for protection of the public and workers against the hazards of ionizing radiation, 18:5209 (R;BE;In French, Dutch)
27 September 1991-Royal Order establishing an emergency plan for nuclear risks on Belgian territory, 18:5210 (R;BE;In French)
6 September 1991-Royal Order amending the Royal Order of 28 February 1963 laying down general regulations for protection of the public and workers against the hazards of ionizing radiation, 18:5211 (R;BE;In French, Dutch)
Memorandum of Understanding between the Kingdom of Belgium and the Kingdom of the Netherlands on early notification of a nuclear accident and exchange of information on the operation of nuclear installations, 18:5621 (R;BE;In French, Dutch)

BELLOWS
Consequences of expansion joint bellows rupture, 18:5662 (R;US)
Plans for containment bellows testing under extreme loads, 18:5657 (R;US)

BENZENE
Mediated electrochemical oxidation of hazardous and mixed wastes, 18:5832 (RA;US)

BENZOPYRROLES
See INDOLES

BERYLLIUM
Electron irradiation experiments in support of fusion materials development, 18:7305 (RA;US)
Microstructural examination of beryllium irradiated at 400°C to 8 dpa, 18:7288 (RA;US)
Microstructural examination of beryllium irradiated at 500C to 1 dpa, 18:7323 (RA;US)
Role of atomic size and valence in bonding and diffusion at metal surfaces, 18:5984 (R;US)
Safety handling of beryllium for fusion technology R and D, 18:7394 (R;JP;In Japanese)
Superconductivity of high-dispersion beryllium condensates, 18:5960 (R;UA;In Russian)
Tritium release from irradiated beryllium at elevated temperatures, 18:7289 (RA;US)

BERYLLIUM 9 TARGET
Investigation of the $^{9}Be(a,n)^{12}C$ reaction. Pt. 2. Differential cross sections for E_a=7.02-15.70 MeV and $E_{ex}(^{12}C)$=0.0, 4.439, 7.654, 9.641, 10.84, 11.83 and 12.71 MeV, 18:7024 (R;DE)

BERYLLIUM ALLOYS
A model for the formation of bands of ultrafine particles in rapidly solidified aluminum-beryllium alloys, 18:5993 (RA;US)
Response of solute and precipitation strengthened copper alloys at high neutron exposure, 18:7356 (RA;US)
Tensile and fracture behavior of Cu-5Ni and various precipitation-strengthened copper alloys after high fluence irradiation, 18:7357 (RA;US)

BERYLLIUM MODERATORS

Facilitated transport ceramic membranes for high temperature gas cleanup, 18:4866 (R;US)

CARBONYL RADICALS
[Infrared tunable difference frequency laser source]: Final technical report, September 15, 1990–September 14, 1992, 18:6094 (R;US)

CARS SPECTROSCOPY
See RAMAN SPECTROSCOPY

CASCADE (EXTRACTION)
See EXTRACTION COLUMNS

CAST IRON
Cupola modeling research: Phase 2 (Year one), Final report, 18:5942 (R;US)

CASTE (INSECTS)
See OCCUPATIONS

CASTING
Computational mechanics applied to the design and analysis of investment casting, 18:5980 (R;US)
Double-motor MHD-drive for casting robot, 18:5985 (RA;FI)

CASTING MOLDS
Reusable molds for casting U-Zr alloys, 18:5916 (R;US)

CASTINGS
Computational mechanics applied to the design and analysis of investment casting, 18:5980 (R;US)
Rapid mesh generation for finite element analysis of investment castings, 18:6221 (R;US)
The application of quality criteria for the prediction of porosity in the design of casting processes, 18:5934 (R;US)

CATALYSTS
Advanced Coal Liquefaction Research and Development Facility, Wilsonville, Alabama: Run 262 with Black Thunder subbituminous coal: Technical progress report, 18:4887 (R;US)
An investigation of catalytic active phase-support interactions by IR, NMR and x-ray absorption spectroscopies: Progress report, January 15, 1992–September 15, 1992, 18:6130 (R;US)
Chemical interactions in multimetal/zeolite catalysts: Progress report, January 7, 1991–January 6, 1992, 18:6128 (R;US)
Correlations between surface structure and catalytic activity/selectivity: Progress report, January 1, 1992–December 31, 1992, 18:6133 (R;US)
Demonstration of selective catalytic reduction (SCR) technology for the control of nitrogen oxide (NO_x) emissions from high-sulfur coal-fired boilers: Quarterly report No. 8, April–June, 1992, 18:5363 (R;US)
Elaboration of catalysts with silica and silica-alumina matrices, 18:6143 (R;FR;In French)
Research of catalysts for isotope enrichment of deuterium oxide in water, 18:5218 (R;BR;In Portuguese)
Synthesis and reactivity of ultra-fine coal liquefaction catalysts, 18:4896 (R;US)
Systematic preparation of selective heterogeneous catalysts: Final report, September 1, 1984–August 31, 1991, 18:6135 (R;US)

CATHODIC PROTECTION
AC corrosion and cathodic protection - field experiments. Final report, 18:5021 (I;DE;In German)

CAVITY RESONATORS
See also SUPERCONDUCTING CAVITY RESONATORS
Computer codes for RF cavity design, 18:6354 (R;US)
Derivation of gyrotron's reduced equations and its application on the analysis of resonant cavities, 18:7186 (R;BR)
Design of rf conditioner cavities, 18:6346 (R;US)
Experimental study of coaxial resonators selective properties, 18:7190 (R;BR;In Portuguese)
Study on the electrodynamical characteristics of an optimized shape accelerating resonator model, 18:6299 (R;UA;In Russian)

CELLULOSE
Processes for pretreating lignocellulosic biomass: A review, 18:5245 (R;US)

CEMENTING
Conditioning of radioactive waste solutions by cementation, 18:5156 (R;DE;In French)

CEMENTS
Critical evaluation of accelerated test methods for detecting alkali-reactivity of aggregates, 18:6244 (R;IT)
Potential alkali-reactivity of Torre Lago (Italy) sand, 18:6243 (R;IT;In Italian)

CENNA
Memorandum of Understanding between the Kingdom of Belgium and the Kingdom of the Netherlands on early notification of a nuclear accident and exchange of information on the operation of nuclear installations, 18:5621 (R;BE;In French, Dutch)

CENTRAL HEATING PLANTS
Storage, transport and firing of sliced straw: Firing experiment. Measurements carried out at Hinnerup district heating plant in June and July 1992, 18:5250 (R;DK;In Danish)

CENTRAL REGION
See USA

CERAMIC MELTERS
Uniformity of material in the SME and MFT, 18:5180 (R;US)

CERAMICS
A round-robin for particle electrophoresis standardization, 18:6004 (R;US)
Comparative cost analysis of ceramic processing techniques, 18:6021 (R;US)
Erosion of composite ceramics, 18:6032 (R;US)
Evaluation of Sialon internal combustion engine components and fabrication of several ceramic components for automotive applications, 18:5888 (R;US)
Excimer laser surface modification: Process and properties, 18:5968 (R;US)
In-waveguide measurements of MMW dielectric properties of ceramic materials for the US fusion reactor materials research program, 18:7370 (RA;US)

Neutron activation analysis of monolithic ceramics and ceramic composites, 18:7297 (RA;US)
Radiation-induced changes in the physical properties of ceramic materials, 18:7365 (RA;US)
Role of porosity in estimates of composite elastic constants, 18:6081 (R;US)
The High Temperature Materials Laboratory: A research and user facility at the Oak Ridge National Laboratory, 18:6114 (R;US)
The synthesis of metal hydrous oxide particles by multiphase electrodispersion, 18:6006 (R;US)

CERIUM
Application of surrogate materials in process study of actinides, 18:6185 (R;US)
Determination of absolute transition probabilities in neutral cerium, 18:6171 (RA;US)

CESIUM
Ethanol synthesis and water gas shift over bifunctional sulfide catalysts: Technical progress report, June 1992–August 1992, 18:4893 (R;US)

CESIUM IODIDES
Optical properties and defect structure of crystalline bodies, 18:5959 (R;UA;In Russian)

CESIUM ISOTOPES
Report of the second research co-ordination meeting on the co-ordinated research programme: rapid instrumental and separation methods for monitoring radionuclides in food and environmental samples, 18:6099 (R;XA)

CFFF
See MHD GENERATOR CFFF

CHANNELS (REACTOR)
See REACTOR CHANNELS

CHARGE CARRIERS
Spin dependent photocurrents in ribbon solar cells, 18:5275 (R;US)

CHARGE EXCHANGE
Charge exchange cross-sections for multiply charged ions, 18:7177 (IA;AR)
Line-emission cross sections for the charge-exchange reaction between fully stripped carbon and atomic hydrogen in tokamak plasma, 18:7216 (R;JP)

CHARGED PARTICLE DETECTION
See also MUON DETECTION
Development of Microstrip Gas Chambers with Multi-Chip technology, 18:6448 (R;JP)

CHARGED PARTICLES

Ductile-Brittle Transitions
The effect of hydrogen, chromium, titanium, and silicon on the ductile-brittle transition temperature of vanadium and vanadium-base alloys, 18:7316 (RA;US)

Gas Production Rates
Helium generation rates in isotopically tailored Fe-Cr-Ni alloys irradiated in FFTF/MOTA, 18:7295 (RA;US)

Magnons
High-energy spin-density-wave correlated fluctuations in paramagnetic Cr + 5 at. % V, 18:5923 (R;US)

Mathematical Models
First-principles approach to alloy phase stability, 18:6156 (RA;US)

Physical Radiation Effects
A microstructural examination of the mechanical response of FeCrNi alloys irradiated at 365 C using isotope tailoring to produce different He/dpa ratios, 18:7345 (RA;US)
A microstructural explanation for irradiation embrittlement of V-15Cr-5Ti, 18:7273 (RA;US)
Effect of MOTA shutdown procedure on radiation-induced microstructural evolution, 18:7291 (RA;US)
Helium generation rates in isotopically tailored Fe-Cr-Ni alloys irradiated in FFTF/MOTA, 18:7295 (RA;US)
High swelling rates observed in neutron-irradiated V-Cr and V-Si binary alloys, 18:7317 (RA;US)
Impact behavior of irradiated V-15Cr-5Ti following hydrogen removal, 18:7272 (RA;US)
Implications of neutron spectrum and flux differences on fission-fusion correlations at high neutron fluence, 18:7256 (RA;US)
Irradiation-induced precipitates in vanadium alloys containing titanium, 18:7315 (RA;US)
Microstructural examination of simple vanadium alloys irradiated in the FFTF/MOTA, 18:7274 (RA;US)
Microstructural investigation of swelling dependence on nickel content in fast-neutron irradiated Fe-Cr-Ni austenitic ternaries, 18:7260 (RA;US)
Microstructures of neutron-irradiated Fe-12Cr-XMn (X=15-30) ternary alloys, 18:7346 (RA;US)
Phosphide formation in neutron-irradiated Fe-15Cr-25Ni-P alloys, 18:7303 (RA;US)
Relationship between microstructure, spinodal-like decomposition and selective electropolishing of irradiated INVAR-type alloys, 18:7258 (RA;US)
Silicon's role in determining swelling in neutron-irradiated Fe-Ni-Cr-Si alloys, 18:7304 (RA;US)
Tensile properties for neutron-irradiated vanadium alloys, 18:7275 (RA;US)
The influence of helium on mechanical properties of model austenitic alloys, determined using ^{59}Ni isotopic tailoring and fast reactor irradiation, 18:7299 (RA;US)
Theoretical analysis of phase transformations in Fe-Ni 'INVAR'-type alloys, 18:7259 (RA;US)

Spin Waves
High-energy spin-density-wave correlated fluctuations in paramagnetic Cr + 5 at. % V, 18:5923 (R;US)

CHROMIUM BASE ALLOYS
High-energy spin-density-wave correlated fluctuations in paramagnetic Cr + 5 at. % V, 18:5923 (R;US)

CHROMIUM IONS
Electron impact excitation cross section measurements of highly charged heliumlike and lithiumlike ions, 18:7071 (R;US)
Electron impact ionization of highly charged lithiumlike ions, 18:7076 (R;US)

CHROMIUM NITRIDES
Adhesive strength, intrinsic stress and corrosion of mixed layers. Partial report, 18:6051 (I;DE;In German)

CHROMIUM OXIDES
Irradiation performance of oxide dispersion strengthened copper alloys to 150 dpa at 415C, 18:7318 (RA;US)

CHROMIUM STEELS

Economic evaluation report, 18:4941 (R;US)
Evaluation of control of fluidization quality through chaotic time series analysis of pressure-drop measurements, 18:4938 (R;US)
Hot gas cleanup test facility for gasification and pressurized combustion: Quarterly technical progress report, April 1–June 30, 1992, 18:4863 (R;US)
Measurement of alkali in PFBC exhaust, 18:4931 (R;US)
Pilot plant test results and demonstration of the Ahlstrom Pyroflow pressurized CFB technology, 18:4942 (R;US)
Second-generation PFBC systems research and development, 18:4939 (R;US)

Grinding
Coal-sand attrition system and its' importance in fine coal cleaning: Quarterly report, May 31, 1991–August 31, 1992, 18:4840 (R;US)

Hardness
Coal-sand attrition system and its' importance in fine coal cleaning: Quarterly report, May 31, 1991–August 31, 1992, 18:4840 (R;US)

Heat Treatments
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, August 1992–July 1992, 18:4891 (R;US)

Infrared Spectra
The dual role of oxygen functions in coal pretreatment and liquefaction: Crosslinking and cleavage reactions: Fifth quarterly report, April 1, 1992–June 30, 1992, 18:4889 (R;US)

Ion Exchange
The dual role of oxygen functions in coal pretreatment and liquefaction: Crosslinking and cleavage reactions: Fifth quarterly report, April 1, 1992–June 30, 1992, 18:4889 (R;US)

Molecular Structure
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, August 1992–July 1992, 18:4891 (R;US)

Nmr Spectra
Advanced NMR approaches in the characterization of coal: [Quarterly] report No. 8, 18:4901 (R;US)

Nuclear Magnetic Resonance
Advanced NMR approaches in the characterization of coal: [Quarterly] report No. 9, 18:4902 (R;US)
Advanced NMR-based techniques for pore structure analysis of coal: Quarterly report No. 3, July 1, 1992–September 30, 1992, 18:4903 (R;US)
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, August 1992–July 1992, 18:4891 (R;US)

Porosity
Advanced NMR-based techniques for pore structure analysis of coal: Quarterly report No. 3, July 1, 1992–September 30, 1992, 18:4903 (R;US)

Processing
Supercritical thermodynamics of sulfur and nitrogen species: Quarterly progress report, July 1, 1992–September 30, 1992, 18:4892 (R;US)

Pulse Combustion
NO_x formation in unsteady combustion, 18:4945 (R;US)

Pyrolysis
Current status of design and construction of ENCOAL Mild Gasification Plant, 18:4877 (R;US)
Development of high energy density fuels from mild gasification of coal: Final report, 18:4860 (R;US)
Measurements and modeling of advanced coal conversion processes, 18:4852 (R;US)
Mild gasification in transport reactors, 18:4846 (R;US)
The dual role of oxygen functions in coal pretreatment and liquefaction: Crosslinking and cleavage reactions: Fifth quarterly report, April 1, 1992–June 30, 1992, 18:4889 (R;US)

Slags
Coal ash behavior in reducing environments, 18:4851 (R;US)
Thermal conductivity of coal ashes and slags, 18:4898 (R;US)

Sorptive Properties
Advanced NMR-based techniques for pore structure analysis of coal: Quarterly report No. 3, July 1, 1992–September 30, 1992, 18:4903 (R;US)

Specifications
Characterization and supply of coal based fuels: Volume 1, Final report and appendix A (Topical report), 18:4837 (R;US)
Staged Combustion
Coal reburning for cyclone boiler NO_x control demonstration: Quarterly report No. 9, April, May, and June 1992, 18:4948 (R;US)
Development of advanced NO_x control concepts for coal-fired utility boilers: Quarterly technical progress report no. 6, January 1, 1992–March 31, 1992, 18:4954 (R;US)
Structural Chemical Analysis
Advanced NMR approaches in the characterization of coal: [Quarterly] report No. 9, 18:4902 (R;US)
Advanced NMR approaches in the characterization of coal: [Quarterly] report No. 8, 18:4901 (R;US)

COAL FINES
Mineral matter behaviour in low-NOx combustion: A laboratory study, 18:4957 (R;NL)
Pyrite surface characterization and control for advanced fine coal desulfurization technologies: Eighth quarterly technical progress report, June 1, 1992–August 31, 1992, 18:4839 (R;US)

COAL GASIFICATION
See also CE ENTRAINED FUEL PROCESS
TEXACO GASIFICATION PROCESS
U-GAS PROCESS
Coal ash behavior in reducing environments, 18:4851 (R;US)
Coal gasification for the coproduction of electricity and fertilizer, 18:4897 (R;US)
Combustion Engineering IGCC Repowering Project, 18:4868 (R;US)
Current status of design and construction of ENCOAL Mild Gasification Plant, 18:4877 (R;US)
Development of high energy density fuels from mild gasification of coal: Final report, 18:4860 (R;US)
H_2S-removal and sulfur-recovery processes using metal salts, 18:4850 (R;US)
Hot gas cleanup test facility for gasification and pressurized combustion: Quarterly technical progress report, April 1–June 30, 1992, 18:4863 (R;US)
METC integrated bench scale gasification and hot gas cleanup studies, 18:4884 (R;US)
Sensitivity of hot gas desulfurization on IGCC cost of electricity, 18:5338 (R;US)
Studies of in-situ calcium-based sorbents in advanced pressurized coal conversion systems, 18:4875 (R;US)
Wabash River Coal Gasification Repowering Project, 18:4881 (R;US)
Biochemical Reaction Kinetics
Development of biological coal gasification (MicGAS) process, 18:4873 (R;US)
By-Products
Development of an advanced, continuous mild gasification process for the production of co-products, 18:4856 (R;US)
Production of mild gasification coproducts, 18:4876 (R;US)
Catalysts
Catalytic gasification fundamentals, 18:4895 (R;US)
Gasifiers optimized for fuel cell applications, 18:4874 (R;US)
Integration of carbonate fuel cells with advanced coal gasification systems, 18:5768 (R;US)
Production of hydrogen and coproducts from coal, 18:5231 (R;US)
Chemical Reactors
Gasification Product Improvement Facility (GPIF), 18:4880 (R;US)
Computerized Simulation
Measurement and modeling of advanced coal conversion processes: 23rd quarterly report, April 1, 1992–June 30, 1992, 18:4854 (R;US)
Measurement and modeling of advanced coal conversion processes: Twenty-second quarterly report, January 2, 1992–March 31, 1992, 18:4853 (R;US)
Demonstration Programs
Toms Creek IGCC Demonstration Project, 18:5340 (R;US)
Hot Gas Cleanup
A calcium oxide sorbent process for bulk separation of carbon dioxide, 18:4870 (R;US)
Ceramic filters for removal of particulates from hot gas streams, 18:4847 (R;US)
Development of hollow-fiber catalytic-membrane reactors for high-temperature gas cleanup, 18:4871 (R;US)
Gas separation with glass membranes: Final report, 18:4865 (R;US)
Gasification Product Improvement Facility (GPIF), 18:4880 (R;US)
Gasifiers optimized for fuel cell applications, 18:4874 (R;US)
High-temperature membranes for gas separation and gas cleanup, 18:4849 (R;US)
Toms Creek IGCC Demonstration Project, 18:5340 (R;US)
Process Development Units
Calderon coal gasification Process Development Unit design and test program, 18:4857 (R;US)
Scaleup of mild gasification to a process development unit, 18:4879 (R;US)
Waste Product Utilization
Fertilizer production facilities of the twenty-first century, 18:5830 (R;US)
TVA's coproduction of electricity and fertilizer project, 18:5829 (R;US)

COAL GASIFICATION PLANTS
Selection of non-adsorbing alkali components, 18:4932 (R;US)

COAL LIQUEFACTION
See also TSL PROCESS
Advanced Coal Liquefaction Research and Development Facility, Wilsonville, Alabama: Run 262 with Black Thunder subbituminous coal: Technical progress report, 18:4887 (R;US)
Coal liquefaction process streams characterization and evaluation: Characterization of coal liquefaction resids employing thermogravimetric analysis and electron spin resonance spectroscopy, 18:4900 (R;US)
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, August 1992–July 1992, 18:4891 (R;US)
Highly dispersed catalysts for coal liquefaction: Quarterly report No. 4, May 23, 1992–August 22, 1992, 18:4890 (R;US)
Process and analytical studies of enhanced low severity coprocessing using selective coal pretreatment: Final technical report, 18:4885 (R;US)
Synthesis and reactivity of ultra-fine coal liquefaction catalysts, 18:4896 (R;US)
The dual role of oxygen functions in coal pretreatment and liquefaction: Crosslinking and cleavage reactions: Fifth quarterly report, April 1, 1992–June 30, 1992, 18:4889 (R;US)

COAL LIQUEFACTION PLANTS
Examination of Japanese samples exposed in the Wilsonville liquefaction reactors, 18:4843 (R;US)

COAL LIQUIDS
Development of high energy density fuels from mild gasification of coal: Final report, 18:4860 (R;US)
Supercritical thermodynamics of sulfur and nitrogen species: Quarterly progress report, July 1, 1992–September 30, 1992, 18:4892 (R;US)

COAL MINERS
Development of a special method for the dust epidemiology of coal mines: Determination of transition probabilities for various stages of coal-workers pneumoconiosis (Phase 1), 18:6720 (I;DE;In German)
Reduction of hazards and physical stress during manriding underground. Final report, 18:4910 (I;DE;In German)

COAL TAR
Measurements and modeling of advanced coal conversion processes, 18:4852 (R;US)

COAL-DERIVED LIQUIDS
See COAL LIQUIDS

COAL-OIL MIXTURES
See COAL
FUEL OILS
FUEL SLURRIES

COATED FUEL PARTICLES
Migration behavior of palladium in UO_2, (3), 18:5464 (R;JP;In Japanese)

COATINGS
See also PROTECTIVE COATINGS
Dual cure solventless coating process: Phase 2, Final report, 18:5815 (R;US)
Examination of laser conditioning using atomic force microscopy, 18:6271 (R;US)
Irradiation behavior of bonded structures: impact of stress-enhanced swelling on irradiation creep and elastic properties, 18:7340 (RA;US)

COBALT
Electron yield XAFS study of evaporated Co/Pd multilayers with various thickness ratios of Co to Pd sublayers: Simulations of the Co K-edge XAFS and fourier transforms, 18:5924 (R;US)
Helium production rates in the LASREF Facility, 18:7296 (RA;US)

COBALT 60
Neutron activation analysis of monolithic ceramics and ceramic composites, 18:7297 (RA;US)

COGENERATION
Studies in the economics of electricity and heating, 18:5743 (R;SE)

COHERENT ANTI-STOKES RAMAN SPECTROSCOPY
See RAMAN SPECTROSCOPY

COHERENT SCATTERING
Measurement of the spatial coherence of a soft x-ray laser, 18:6366 (R;AU)

COILS (MAGNETIC)
See MAGNET COILS

COKE
Catalytic gasification fundamentals, 18:4895 (R;US)
Combustion reactivity of coke particles using Risoe-model, 18:4961 (RA;DK)
Comparison of results between VTT, Risoe and NTH: Model calculations based on the same experimental results, 18:4962 (RA;DK)
Formation and chemical characteristics of coke deposits in typical hydrocarbon reactions on acid monofunctional zeolite catalysts. Final report, 18:6141 (I;DE;In German)
Reactivity measurements of coke particles in five different flow reactors, 18:4959 (RA;DK)

COLD FUSION
Investigation of cold nuclear fusion in condensed matter: Final report, 18:7154 (R;US)

COLD PLASMA
Recombining processes in a cooling plasma by mixing of initially heated gas, 18:7226 (R;JP)

COLLECTIVE ACCELERATORS
Charged particle acceleration by high-current electron beam in plasma waveguide, 18:6296 (R;UA;In Russian)

COLLECTIVE MODEL
The generalized collective model, 18:6967 (R;DE;In German)

COLLEGES
See EDUCATIONAL FACILITIES

COLLIDER DETECTOR AT FERMILAB
See FERMILAB COLLIDER DETECTOR

COLLIDING BEAMS
A new concept for an asymmetric Φ factory to test CPT and study K_s^0 mesons, 18:6276 (R;US)
Reducing bunch disruption in transition crossing by modification of the rf waveform, 18:6294 (R;US)

COLLISIONS
See also ATOM COLLISIONS
ION COLLISIONS
Analysis of forward and inverse problems in chemical dynamics and spectroscopy: Summary report, February 1, 1990–August 1, 1992, 18:6125 (R;US)

COLOGNE SPIRITS
See ETHANOL

COLOR MODEL
Unified SU(4) color models in ten dimensions, 18:6911 (R;AU)

COMPARATIVE EVALUATIONS
Present state of environmental pollution in Japan and East Asian Countries.: Atmospheric pollution, 18:6478 (IA;JP;In Japanese)

COMPOSITE MATERIALS
See also FIBERGLASS

Aluminium
Cooling in superconducting magnet. (I).: Principle (magnet stabilization by cooling), 18:6827 (IA;JP;In Japanese)

Chemical Analysis
Neutron activation analysis of monolithic ceramics and ceramic composites, 18:7297 (RA;US)

Compression Strength
A performance model for thick composite cylinders subjected to external hydrostatic pressure, 18:6043 (R;US)

Copper
Cooling in superconducting magnet. (I).: Principle (magnet stabilization by cooling), 18:6827 (IA;JP;In Japanese)

Design
A carbon-carbon composite materials development program for fusion energy applications, 18:7411 (R;US)

Elasticity
Role of porosity in estimates of composite elastic constants, 18:6081 (R;US)

Electron Microscopy
Localized elastic and inelastic scattering processes for electrons in multilayer structures, 18:6040 (RA;US)

Erosion
Erosion of composite ceramics, 18:6032 (R;US)

Mechanical Properties
Theoretical models for the ultimate strength and flaw resistance of unidirectionally-reinforced ceramic-matrix composites: Progress report, September 1989–August 1992, 18:6048 (R;US)

Nondestructive Testing
An acousto-ultrasonic NDE technique for monitoring material anisotropy, 18:6033 (R;US)

Permeability
Gas leak rate estimates for ceramic matrix composites, 18:7328 (RA;US)

Physical Radiation Effects
Measurement of the effect of radiation damage to ceramic composite interfacial strength, 18:7329 (RA;US)
Radiation induced microstructure and mechanical property evaluation of SiC/C/SiC composite materials, 18:7330 (RA;US)

Production
Polyorganosilazane preceramic binder development for reaction bonded silicon nitride composites, 18:6064 (R;US)

Residual Stresses
Diffraction measurements of residual stress in titanium matrix composites, 18:6059 (R;US)
Neutron diffraction study of the pseudo-macro residual stresses in $ZrO_2(CeO_2)/Al_2O_3$ ceramic composites, 18:6005 (R;US)

Strains
Application of neutron diffraction technology to the determination of residual strain in engineering composites, 18:6035 (R;US)
Strain measurement in individual phases of an Al/TiC composite during mechanical loading, 18:6057 (R;US)

Stresses
A method of determination of the regular stress term for an arbitrary joint geometry under thermal loading, 18:6055 (R;DE)

Technology Assessment
Composite materials for fusion applications, 18:7327 (RA;US)
High-temperature mechanical and material design for SiC composites, 18:7326 (RA;US)

Tensile Properties
Tensile failure in metal-matrix composites, 18:6080 (RA;US)

Tribology
Tribological and microstructural investigation of the PM200 series of self-lubricating composites, 18:6049 (R;US)

COMPOSITE MODELS

COPOLYMERS
Solubilization of trace organics in block copolymer micelles for environmental separation using membrane extraction principles: Progress report, May 1, 1992–December 31, 1992, 18:6609 (R;US)
COPPER
Adsorption
A novel, integrated treatment systems for coal wastewaters: Quarterly Report, June 2, 1992–September 1, 1992, 18:4905 (R;US)
Correlations between surface structure and catalytic activity/selectivity: Progress report, January 1, 1992–December 31, 1992, 18:6133 (R;US)
Aluminium Alloys
Aluminium and copper analysis in metallic alloys by neutron activation analysis from an ^{241} Am-Be source, 18:6101 (I;BR;In Portuguese)
Charged-Particle Transport
Interaction of low-energy electrons and positrons with condensed matter: Stopping powers and inelastic mean free paths from optical data, 18:7119 (RA;US)
Chemical Vapor Deposition
Chemistry of copper CVD precursors on a Pt(111) surface, 18:5983 (R;US)
Deposition
Covalent nitrides for maskless laser writing of microscopic metal lines, 18:6259 (R;US)
Vacuum deposition of copper on Type 304L stainless steel, 18:5997 (R;US)
Electronic Structure
Electron Compton scattering in the electron microscope, 18:5925 (RA;US)
Positronium formation and photoemission spectroscopy for surface, 18:5927 (RA;US)
Fracture Properties
Fracture at Cu/sapphire interfaces, 18:5971 (R;US)
Gas Production Rates
Helium production rates in the LASREF Facility, 18:7296 (RA;US)
Grain Boundaries
The real-space multiple-scattering theory and the electronic structure of grain boundaries, 18:6160 (RA;US)
Hardening
The roles of slip geometry and hardening behavior in intergranular toughness: Progress report, January 15, 1992–January 15, 1993, 18:5938 (R;US)
Ion Collisions
Excited substates mixing of fast heavy ions in solids, 18:7118 (RA;US)
Transient adsorption, energy loss, and momentum transfer in low velocity ion surface scattering, 18:7110 (RA;US)
Neutron Activation Analysis
Aluminium and copper analysis in metallic alloys by neutron activation analysis from an ^{241} Am-Be source, 18:6101 (I;BR;In Portuguese)
Photoelectron Spectroscopy
Atomic-resolution imaging with photoelectron holography, 18:6116 (RA;US)
Physical Radiation Effects
A comparison of microstructures in copper irradiated with fission, fusion, and spallation neutrons, 18:7342 (RA;US)
Conductivity changes observed in generation 1.0 copper alloys irradiated at 430C to 16-98 dpa, 18:7277 (RA;US)
Density changes of generation 1.5 and 2.0 copper alloys irradiated at 411-414°C and 529°C in FFTF-MOTA, 18:7278 (RA;US)
Fission neutron irradiation of copper containing implanted and transmutation produced helium, 18:7355 (RA;US)
Molecular dynamics and binary collisions modeling of the primary damage state of collision cascades, 18:7343 (RA;US)
Tensile property changes of metals and irradiated to low doses with fission, fusion and spallation neutrons, 18:7341 (RA;US)
The morphology of collision cascades as a function of recoil energy, 18:7255 (RA;US)
Quantitative Chemical Analysis
Helium production rates in the LASREF Facility, 18:7296 (RA;US)
Soldering
Effects of simulated storage on the solder wettability of inhibited substrates, 18:6270 (R;US)
Spectroscopy
Positronium formation and photoemission spectroscopy for surface, 18:5927 (RA;US)
Strains
Deformation behavior of pre-shocked copper as a function of strain rate and temperature, 18:5991 (RA;US)
Wettability
Effects of simulated storage on the solder wettability of inhibited substrates, 18:6270 (R;US)
COPPER 63 TARGET
Charge correlations in the breakup of gold projectiles in reactions at E/A=600 MeV, 18:7002 (R;DE;In German)
COPPER ALLOYS

Report of the second research co-ordination meeting on the co-ordinated research programme: rapid instrumental and separation methods for monitoring radionuclides in food and environmental samples, 18:6099 (R;XA)

ENVIRONMENTAL POLICY

Air Pollution Abatement

Abatement of energy-related CO_2 emissions in the Federal Republic of Germany. Resolution of the German Federal Government on the abatement of energy-related CO_2 emissions in the Federal Republic of Germany based on the Second Intermediate Report of the Interministerial Study Group 'CO_2 abatement' (IMA CO... 18:5699 (I;DE;In German)

Federal Government decision on the reduction of CO_2-emissions in the Federal Republic of Germany until 2005, 18:5697 (I;DE;In German)

Carbon Dioxide

Abatement of energy-related CO_2 emissions in the Federal Republic of Germany. Resolution of the German Federal Government on the abatement of energy-related CO_2 emissions in the Federal Republic of Germany based on the Second Intermediate Report of the Interministerial Study Group 'CO_2 abatement' (IMA CO... 18:5699 (I;DE;In German)

Federal Government decision on the reduction of CO_2-emissions in the Federal Republic of Germany until 2005, 18:5697 (I;DE;In German)

Ecology

Ecological rehabilitation and development in the new states of unified Germany. A resolution passed on the occasion of the 37th Environment Ministers Conference , Leipzig, November 21/22, 1991, 18:5702 (I;DE;In German)

Econometrics

A disaggregated econometric model for the Federal Republic of Germany to evaluate economic effects of environmental policy, 18:5682 (I;DE)

Economic Impact

A disaggregated econometric model for the Federal Republic of Germany to evaluate economic effects of environmental policy, 18:5682 (I;DE)

Federal Republic Of Germany

A disaggregated econometric model for the Federal Republic of Germany to evaluate economic effects of environmental policy, 18:5682 (I;DE)

Abatement of energy-related CO_2 emissions in the Federal Republic of Germany. Resolution of the German Federal Government on the abatement of energy-related CO_2 emissions in the Federal Republic of Germany based on the Second Intermediate Report of the Interministerial Study Group 'CO_2 abatement' (IMA CO... 18:5699 (I;DE;In German)

Federal Government decision on the reduction of CO_2-emissions in the Federal Republic of Germany until 2005, 18:5697 (I;DE;In German)

Global Aspects

Necessity for a global environmental policy. The goals of the Federal Republic of Germany at the UNCED in Rio de Janeiro, 18:5700 (I;DE;In German)

Government Policies

Ecological rehabilitation and development in the new states of unified Germany. A resolution passed on the occasion of the 37th Environment Ministers Conference , Leipzig, November 21/22, 1991, 18:5702 (I;DE;In German)

Federal Government decision on the reduction of CO_2-emissions in the Federal Republic of Germany until 2005, 18:5697 (I;DE;In German)

HYDRODYNAMICS

Accuracy
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Accuracy improvement in cascade flow analyzing methods, 18:5879 (IA;JP;In Japanese)

Aerodynamics
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5873 (IA;JP;In Japanese)

Anisotropy
Fundamental problems in gas turbine related numerical fluid dynamics.: Reaction models, 18:5869 (IA;JP;In Japanese)

Asymptotic Solutions
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)

Boundary Conditions
Fundamental problems in gas turbine related numerical fluid dynamics.: Basic equation and boundary condition, 18:5865 (IA;JP;In Japanese)

Chemical Reactions
Problems on numerical analysis relating to gas turbines.: Basis and application examples, 18:5864 (I;JP;In Japanese)

Compressible Flow
Fundamental problems in gas turbine related numerical fluid dynamics.: Basic equation and boundary condition, 18:5865 (IA;JP;In Japanese)

Computer Calculations
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5873 (IA;JP;In Japanese)
Fundamental problems in gas turbine related numerical fluid dynamics.: Basic equation and boundary condition, 18:5865 (IA;JP;In Japanese)
Fundamental problems in gas turbine related numerical fluid dynamics.: Calculation meshes, 18:5867 (IA;JP;In Japanese)
Fundamental problems in gas turbine related numerical fluid dynamics.: Turbulence models, 18:5868 (IA;JP;In Japanese)
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)
Problems in gas turbine related numerical analysis and peripheral techniques.: Problems in peripheral techniques, 18:5884 (IA;JP;In Japanese)
Problems in practical application of gas turbine related numerical analysis and its future outlook.: Problems and future outlook for practical application, 18:5885 (IA;JP;In Japanese)
Problems on numerical analysis relating to gas turbines.: Basis and application examples, 18:5864 (I;JP;In Japanese)

Computer Codes
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5873 (IA;JP;In Japanese)

Computerized Simulation
Problems on numerical analysis relating to gas turbines.: Basis and application examples, 18:5864 (I;JP;In Japanese)

Conservation Laws
Fundamental problems in gas turbine related numerical fluid dynamics.: Basic equation and boundary condition, 18:5865 (IA;JP;In Japanese)

Dissipation Factor
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)

Dynamic Loads
Validation of empirical formulas for estimation of flexible cylinders vibration maximum amplitude, 18:6239 (R;BR;In Portuguese)

Equations
Fundamental problems in gas turbine related numerical fluid dynamics.: Basic equation and boundary condition, 18:5865 (IA;JP;In Japanese)

Flow Models
Fundamental problems in gas turbine related numerical fluid dynamics.: Turbulence models, 18:5868 (IA;JP;In Japanese)

Fluid Flow
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5873 (IA;JP;In Japanese)

Heat Transfer
Problems on numerical analysis relating to gas turbines.: Basis and application examples, 18:5864 (I;JP;In Japanese)

Laminar Flow
Fundamental problems in gas turbine related numerical fluid dynamics.: Reaction models, 18:5869 (IA;JP;In Japanese)

Mesh Generation
Fundamental problems in gas turbine related numerical fluid dynamics.: Calculation meshes, 18:5867 (IA;JP;In Japanese)

Navier-Stokes Equations
Fundamental problems in gas turbine related numerical fluid dynamics.: Basic equation and boundary condition, 18:5865 (IA;JP;In Japanese)
Fundamental problems in gas turbine related numerical fluid dynamics.: Turbulence models, 18:5868 (IA;JP;In Japanese)
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)

Numerical Analysis
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Accuracy improvement in cascade flow analyzing methods, 18:5879 (IA;JP;In Japanese)
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)
Problems on numerical analysis relating to gas turbines.: Basis and application examples, 18:5864 (I;JP;In Japanese)

One-Dimensional Calculations
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)

Phase Velocity
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)

Reliability
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of compressor cascades, 18:5873 (IA;JP;In Japanese)

Shear
Validation of empirical formulas for estimation of flexible cylinders vibration maximum amplitude, 18:6239 (R;BR;In Portuguese)

Shock Waves
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)

Turbulent Flow
Fundamental problems in gas turbine related numerical fluid dynamics.: Reaction models, 18:5869 (IA;JP;In Japanese)
Problems on numerical analysis relating to gas turbines.: Basis and application examples, 18:5864 (I;JP;In Japanese)

Unsteady Flow
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Accuracy improvement in cascade flow analyzing methods, 18:5879 (IA;JP;In Japanese)

Variations
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)

Viscosity
Fundamental problems in gas turbines related numerical fluid dynamics.: Numerical solution methods, 18:5866 (IA;JP;In Japanese)
FLUIDIZATION
Application of superfluid helium cooling to space, 18:7146 (IA;JP;In Japanese)
FLUIDIZED BED

FORESTRY
The long bundler: Development and testing of a machine for bundling of small trees, 18:5234 (R;SE;In Swedish)
FORESTS
Acid Rain
Experimental manipulation of a forest ecosystem: The Klosterhede-project. Project description, 18:6780 (R;DK)

Aerial Monitoring
Evaluation of forest damage in the research area 'Wank' in the Bavarian Alps in 1987-1990, 18:6743 (RA;DE;In German)

Air Pollution
Comparative evaluation of total plant species combination at sites with different deposition in the Bavarian Alps, 18:6744 (RA;DE;In German)
Evaluation of forest damage in the research area 'Wank' in the Bavarian Alps in 1987-1990, 18:6743 (RA;DE;In German)
Ion fluxes in spruce (Picea abies, [L.] Karst.) and beech tree (Fagus sylvatica, L.) ecosystems of the inner Bavarian Forest (National Park Bavarian Forest) with special regard to higher altitudes, 18:6755 (RA;DE;In German)
Natural C- and N-isotope ratios in different compartments of damaged and healthy spruce forests, 18:6753 (RA;DE;In German)

Air Pollution Monitoring
Micrometeorology and vertical gradients of air pollutants in a spruce stand of the Bavarian Forest National Park, 18:6495 (RA;DE;In German)
Trace substance deposition into coniferous forests by fog interception in high elevations of Black Forest, 18:6515 (RA;DE;In German)

Chemical Analysis
Element content in spruces at various altitudes in the area of the Bavarian Alps, 18:6750 (RA;DE;In German)

Classification
Forest damage surveys in Hungary, 18:6726 (RA;DE)

Damage
Importance of precipitation deposition in the field and in forest ecosystems, 18:6491 (RA;DE;In German)
On problems of indemnification for the 'new type' of forest damage, 18:5698 (I;DE;In German)

Economics
On problems of indemnification for the 'new type' of forest damage, 18:5698 (I;DE;In German)

Forestry
On problems of indemnification for the 'new type' of forest damage, 18:5698 (I;DE;In German)

Hungary
Forest damage surveys in Hungary, 18:6726 (RA;DE)

Infrared Surveys
Comparative evaluation of total plant species combination at sites with different deposition in the Bavarian Alps, 18:6744 (RA;DE;In German)

Leachates
Ion fluxes in spruce (Picea abies, [L.] Karst.) and beech tree (Fagus sylvatica, L.) ecosystems of the inner Bavarian Forest (National Park Bavarian Forest) with special regard to higher altitudes, 18:6755 (RA;DE;In German)

Leaves
Element content in spruces at various altitudes in the area of the Bavarian Alps, 18:6750 (RA;DE;In German)

Liming
Prevention and alleviation of air pollution induced forest damage through soil amelioration, 18:6548 (RA;FI)

Meteorology
Micrometeorology and vertical gradients of air pollutants in a spruce stand of the Bavarian Forest National Park, 18:6495 (RA;DE;In German)

Monitoring
Forest damage surveys in Hungary, 18:6726 (RA;DE)

Nutrients
Ion fluxes in spruce (Picea abies, [L.] Karst.) and beech tree (Fagus sylvatica, L.) ecosystems of the inner Bavarian Forest (National Park Bavarian Forest) with special regard to higher altitudes, 18:6755 (RA;DE;In German)

Pathological Changes
Forest damage surveys in Hungary, 18:6726 (RA;DE)

Plant Diseases
Climatic conditions in Bavariua under the aspect of new forest damages (continuation). Final report, 18:6481 (I;DE;In German)

Site Characterization
Comparative evaluation of total plant species combination at sites with different deposition in the Bavarian Alps, 18:6744 (RA;DE;In German)

Soils
Ion fluxes in spruce (Picea abies, [L.] Karst.) and beech tree (Fagus sylvatica, L.) ecosystems of the inner Bavarian Forest (National Park Bavarian Forest) with special regard to higher altitudes, 18:6755 (RA;DE;In German)

Trees
Airborne acid pollution of beech and spruce stands in Hungary (Sopron) and Hessen (Witzenhausen), 18:6490 (RA;DE;In German)

FORMALDEHYDE
High resolution photoelectron spectroscopy and femtosecond intramolecular dynamics using supersonic molecular beams, 18:6151 (R;US)
Organic aerogels: The next generation, 18:6074 (RA;US)

FORMALIN

HANFORD PRODUCTION REACTORS
PT-105-408-P, Irradiation of insulators: Final report, 18:5500 (R;US)

Buildings
Analysis of K-Area core samples for K-Area formation stabilization work, 18:5602 (R;US)

Connectors
Process Test MR-105-19 evaluation of the slip joint C-Reactor rear pigtail replacement, 18:5508 (R;US)

Containment Systems
Existing Reactor Containment Program, 18:5486 (R;US)

Control Elements
Final report: Pile technology Development Test 105-571-A: Molded ribbed sphincter seal and seal leakage test for the "C" horizontal rod, 18:5478 (R;US)
Production Test No. 105-51-P Supplement A, Pneumatic test of vertical thimbles: Final report, 18:5475 (R;US)
Production Test No. 105-530-A, Supplement B: New methods of fabricating horizontal control rods, 18:5476 (R;US)

Failed Element Detection
Development Test No. 105-609-A: Test of the prototype gamma monitor slug rupture detection equipment at 105-C, 18:5477 (R;US)
Final report: Development Test No. 105-609-A: Slug rupture detection experiments at 105-C, 18:5479 (R;US)

Fuel Elements
Fuels Preparation Department monthly report, June 1957, 18:5521 (R;US)
Production Test 105-8-MR, Supplement A: Uranium charging during reactor operation, 18:5511 (R;US)

Fuel Rods
Interim report No. 1, RT 105-577-A: Irradiation of solid and cored hot pressed fuel elements, 18:5512 (R;US)
Interim report No. 2 on Production Test No. 105-17-P, Laboratory evaluation of proposed lubricants, 18:5497 (R;US)
Interim report, cocked-slug, flush-charging relations for C-Pile conditions, 18:5518 (R;US)
PT-105-519-E, Supplement A: Raising permissible outlet water temperatures of selected tubes at C Pile, 18:5506 (R;US)
Process Test MR-105-16 zinc shielding slugs, 18:5505 (R;US)

Inspection
Production Test No. 105-522-E, Examination of pile process tubes, 18:5502 (R;US)

Loss Of Coolant
C-Pile pigtail failure, 18:5618 (R;US)

Modifications
Water treatment modifications to present areas, 18:5510 (R;US)

Neutron Flux
Development Test No. 105-518-SI—Irradiation service request No. 132 low energy neutron flux spectrum in process tubes, 18:5507 (R;US)

Pipes
Piping changes for increased production at B, D, DR, F, C, and H reactors, 18:5526 (R;US)

Radiation Monitoring
Reactor Section, Radiation Monitoring Sub-Section monthly report, August 1954, 18:5485 (R;US)

Reactor Channels
Process Test MR-105-15, Production increases by the use of venturi orifices, 18:5504 (R;US)

Reactor Cooling Systems
Adequacy of the old reactor backup cooling systems, 18:5525 (R;US)
Development Test 105-558-E: Evaluation of high Na_2O neutralization in activated silica preparation, 18:5516 (R;US)
Future acid, silicate and silica requirements – 100 areas, 18:5517 (R;US)
Provision for activated silica at 183-B, 18:5503 (R;US)

Reactor Monitoring Systems
Analog to digital converter system for temperature monitoring – B, C, D, DR, F, and H reactors, 18:5481 (R;US)

Reactor Operation
A study of expected reactor powers after project CG-558 as determined by slug rupture considerations, 18:5520 (R;US)
Analysis of reactor water piping statement of problem and suggested solutions, 18:5522 (R;US)
Future power levels of Hanford Piles, 18:5514 (R;US)
Hanford Atomic Products Operation monthly report for June 1955, 18:5515 (R;US)
Irradiation Processing Department monthly report, April 1961, 18:5532 (R;US)
Irradiation Processing Department monthly report, April 1963, 18:5550 (R;US)
Irradiation Processing Department monthly report, April 1964, 18:5580 (R;US)
Irradiation Processing Department monthly report, August 1961, 18:5535 (R;US)
Irradiation Processing Department monthly report, August 1962, 18:5542 (R;US)

Irradiation Processing Department monthly report, November 1962, 18:5544 (R;US)
Irradiation Processing Department monthly report, November 1963, 18:5562 (R;US)
Irradiation Processing Department monthly report, November 1964, 18:5585 (R;US)
Irradiation Processing Department monthly report, October 1960, 18:5527 (R;US)
Irradiation Processing Department monthly report, October 1963, 18:5560 (R;US)
Irradiation Processing Department monthly report, September 1961, 18:5536 (R;US)
Irradiation Processing Department monthly report, September 1962, 18:5543 (R;US)
Irradiation Processing Department monthly report, September 1963, 18:5558 (R;US)
Irradiation Processing Department monthly report, September 1964, 18:5584 (R;US)
Operating history of Hanford Piles, 18:5617 (R;US)
Production losses and reactor performance at the Hanford reactors, 18:5519 (R;US)
Reactor Operations daily report, July 1, 1966–June 30, 1967, 18:5496 (R;US)

Reactor Safety
Safety experience: Reactor and critical facilities, 18:5616 (R;US)

Reactor Shutdown
"P" Department: 100-B Area shutdown progress report: Final report (Interim April 10–April 26, 1946), 18:5498 (R;US)

Service Life
Estimate of life of manufacturing piles, 18:5513 (R;US)

Shielding
Process Test MR-105-13, Determination of the value of zinc insert extensions in preventing sticking front nozzle inserts, 18:5501 (R;US)

Tanks
Process Test MR-105-23 cathodic protection of the 107-C retention basins, 18:5509 (R;US)

Test Facilities
Description of facilities for Hanford irradiation of reactor materials, 18:5499 (R;US)

HANFORD RESERVATION
1952 at Hanford Works, 18:5068 (R;US)
Documents containing operating data for Hanford separations processes, 1944–1972: Hanford Environmental Dose Reconstruction Project, 18:6698 (R;US)
Hanford Environmental Compliance Project, Hanford Site, Richland, Washington: Environmental assessment, 18:6557 (R;US)
Hanford Environmental Dose Reconstruction Project: Monthly report, 18:6697 (R;US)
Hanford Site physical separations CERCLA treatability test plan, 18:5136 (R;US)
Independent technical review of the Hanford Tank Farm Operations, 18:5132 (R;US)
Integrated Voice/Data Telecommunications System, US Department of Energy Hanford Site, Richland, Washington: Environmental assessment, 18:6206 (R;US)
Maintenance Implementation Plan for the Waste Tank maintenance and production management, 18:5175 (R;US)
Quarterly report of RCRA groundwater monitoring data for period April 1, 1992–June 30, 1992, 18:6614 (R;US)
RCRA facility investigation/corrective measures study work plan for the 100-HR-1 operable unit, Hanford Site, Richland, Washington, 18:5187 (R;US)
RCRA facility investigation/corrective measures study work plan for the 100-HR-3 operable unit, Hanford Site, Richland, Washington, 18:5188 (R;US)
Report on the EH special review of occupational safety and health programs for the Hanford high-level waste tanks, 18:5131 (R;US)
Standard review plan for Environmental Restoration program Quality Assurance Management Plans: Revision 1, 18:7422 (R;US)
Thermocouple tree system installation and operation in nonleaking ferrocyanide tanks, Hanford Site, Richland, Washington: Environmental assessment, 18:5130 (R;US)
Vascular plants of the Hanford Site, 18:6595 (R;US)

HAPO
A review of past experiences with H.I. survey problems, 18:5192 (R;US)
Chemical Processing Department monthly report for March 1960, 18:5098 (R;US)
Hanford Atomic Products Operation monthly report for June 1955, 18:5515 (R;US)
Hanford Laboratories Operation monthly activities report, May 1957, 18:5071 (R;US)
Hanford Laboratories Operation monthly activities report, September 1957, 18:5076 (R;US)

HARDENING
The roles of slip geometry and hardening behavior in intergranular toughness: Progress report, January 15, 1992–January 15, 1993, 18:5938 (R;US)

HARMONIC OSCILLATORS
The variational spiked oscillator, 18:6804 (R;BR)

HARVESTING
Decision making in peat production: Need for a support system. A case., 18:4911 (R;FI;In Finnish)
EKO-900 method, 18:4926 (RA;FI;In Finnish)
Intensification of sod peat harvesting technology and the effects of it on production costs, 18:4928 (RA;FI;In Finnish)
Models for decision making on the contractor and production company levels in peat production, 18:4919 (RA;FI;In Finnish)
Sod peat based multiple peat production method, 18:4929 (RA;FI;In Finnish)

HARVESTING EQUIPMENT
EKO-900 method, 18:4926 (RA;FI;In Finnish)
Increasing of the grain size and decreasing of the power demand via research of both active and passive millers, 18:4920 (RA;FI;In Finnish)
Research and development of pneumatic harvesting using pneuma-simulator, 18:4921 (RA;FI;In Finnish)
Stump removal in peat production, 18:4924 (RA;FI;In Finnish)
Utilization of Soviet peat technology, 18:4927 (RA;FI;In Finnish)

HAZARDOUS MATERIALS
Chemical Hygiene and Safety Plan, 18:6787 (R;US)
Closure of hazardous and mixed radioactive waste management units at DOE facilities, 18:5208 (R;US)
Commercially available broadband electromagnetic systems for US Department of Energy waste-site characterization, 18:6566 (R;US)
DOE methods for evaluating environmental and waste management samples, 18:6087 (R;US)
Evaluation program effectiveness of household hazardous waste collection: The Seattle-King County experience, 18:5844 (R;US)
Facility Effluent Monitoring Plan determinations for the Operations Support Services facilities (100, 200, 300, 400, and 1100 Areas): Environmental assurance, 18:5183 (R;US)
Hazardous Waste Cerification Plan: Hazardous Waste Handling Facility, Lawrence Berkeley Laboratory, 18:5163 (R;US)
Molten-salt destruction process for mixed wastes, 18:5833 (RA;US)
Review of the DOE Packaging and Transportation Safety Program, 18:5113 (R;US)
The US Environmental Protection Agency's "contained-in" policy and its impact on groundwater issues at Oak Ridge National Laboratory, 18:5126 (R;US)

HIGH-BETA PLASMA
High beta effects and nonlinear evolution of the TAE instability, 18:7153 (R;US)
HIGH-FREQUENCY DISCHARGES
Large amplitude striations in an RF discharge, 18:7242 (R;JP)
HIGH-LEVEL RADIOACTIVE WASTES
ALPHN: A computer program for calculating (α, n) neutron production in canisters of high-level waste, 18:5168 (R;US)
Handbook of high-level radioactive waste transportation, 18:5111 (R;US)
Independent technical review of the Hanford Tank Farm Operations, 18:5132 (R;US)
Investigation of waste form materials suitable for immobilizing actinide elements in high-level waste, 18:5155 (R;JP;In Japanese)
Report on the EH special review of occupational safety and health programs for the Hanford high-level waste tanks, 18:5131 (R;US)
Stochastic models for predicting pitting corrosion damage of radioactive-waste containers, 18:5172 (RA;US)
Thermocouple tree system installation and operation in non-leaking ferrocyanide tanks, Hanford Site, Richland, Washington: Environmental assessment, 18:5130 (R;US)
Vapor space sampling of ferrocyanide tanks, Hanford Site, Richland, Washington: Environmental Assessment, 18:5182 (R;US)
Volatilization behavior of semivolatile elements in vitrification of high-level liquid waste: Research report on solidification of high-level liquid waste, 18:5169 (R;JP;In Japanese)
HIGH-TC SUPERCONDUCTORS
Alternative superconducting systems, 18:7142 (I;DE;In German)
Critical current density, irreversibility line, and flux creep activation energy in silver-sheathed $Bi_2Sr_2Ca_2Cu_3O_x$ superconducting tapes, 18:5999 (R;US)
Influence of preparation technique of ceramic superconductors on structure, mechanical and electrical properties. Final report, 18:6015 (I;DE;In German)
Ion beam-based characterization of multicomponent oxide thin films and thin film layered structures, 18:6089 (R;US)
LLNL/UC Davis high-T_c collaboration: Highlights of the University program, 18:6029 (RA;US)
MOCVD for high temperature supraconductors. Precursors for high temperature supraconductors. Final report, 18:6053 (I;DE;In German)
Magnetic properties of superconducting $Y_1Ba_2[Cu_{1-x}Zn_x]_3O_7$, 18:6019 (R;DE;In German)
Magnetically insulated ion diodes for synthesis of advanced materials, 18:5225 (R;US)
Magnetization and flux pinning in high-$T_c$cuprates: Irradiated and oxygen deficient materials, 18:6007 (R;US)
Midwest Superconductivity Consortium: Progress report, 1992, 18:7129 (R;US)
Oxygen configurations and their effect on charge transfer in $YBa_2Cu_3O_z$, 18:6025 (R;US)

Positron annihilation studies of the electronic structure and fermiology of the high-T_c superconductors, 18:6002 (R;US)
Positron studies of defected metals, metallic surfaces: Final report, July 1, 1985–December 1, 1991, 18:6008 (R;US)
Production of supraconducting oxide layers with the sol-gel-dipping method. Final report, 18:6030 (I;DE;In German)
Some basic phenomena and their importance in relation to techniques for sputter- and vapor-deposition of high temperature superconducting thin films, 18:6003 (RA;US)
Studies of microstructure/critical current density relationships for grain boundaries in $YBa_2Cu_3O_{7-\delta}$ bicrystals, 18:6000 (R;US)
Study of high T_c superconducting thin films grown by MOCVD: Final report, July 1, 1986–April 30, 1990, 18:7128 (R;US)

HIGH-VOLTAGE PULSE GENERATORS
An overview of Sandia National Laboratories' plasma switched, gigawatt, ultra-wideband impulse transmitter program, 18:6455 (R;US)
Explosive pulse power for fusion applications, 18:7402 (R;US)
Explosively driven opening switch for the 20-megampere Procyon experiments, 18:7401 (R;US)

HILACS
Application of radiofrequency superconductivity to accelerators for high-current ion beams, 18:6314 (R;US)
HILDA: Heavy Ion Linac Design Analysis code, 18:7456 (CM;US)
Review of superconducting ion linacs, 18:6274 (R;US)

HITACHI TRAINING REACTOR
See HTR REACTOR

HODOSCOPES
Development of a fragment detector system for the study of peripheral collisions at high beam energies, 18:6403 (R;DE;In German)

HOG FUEL
See WOOD WASTES

HORIZONTAL AXIS TURBINES
Combined Experiment Phase 1: Final report, 18:5327 (R;US)
Effect of the flap and edgewise bending moment phase relationships on the fatigue loads of a typical HAWT blade, 18:5334 (R;US)
Kinematically nonlinear finite element model of a horizontal axis wind turbine. Part 2: Supplement. Inertia matrices and aerodynamic model, 18:5324 (R;DK)
Kinematically nonlinear finite element model of a horizontal axis wind turbine. Part 1: Mathematical model and results, 18:5323 (R;DK)
Power factor and power control of the boost rectifier and the chopper controlled rectifier, 18:5319 (R;NL)
Report on the passive control of horizontal axis wind turbines, 18:5322 (R;GB)
The Tjaereborg wind turbine: Final report, 18:5326 (R;DK)

HOSPITALS
Radiological cadastre of the Land Hessen. Report on the handling of unsealed radioactive material in Hessen from 1980 until 1989. Working field: Medical science, 18:6646 (I;DE;In German)

HOT GAS CLEANUP
Development of hollow-fiber catalytic-membrane reactors for high-temperature gas cleanup, 18:4871 (R;US)
Hot Gas Cleanup Test Facility for Gasification and Pressurized Combustion, 18:4861 (R;US)
Hot gas cleanup test facility for gasification and pressurized combustion: Quarterly technical progress report, January 1–March 31, 1992, 18:4862 (R;US)
Hot gas cleanup test facility for gasification and pressurized combustion: Quarterly technical progress report, April 1–June 30, 1992, 18:4863 (R;US)
Low-cost ceramic membranes and supports for gas separation, 18:4845 (R;US)

HOUSEHOLDS
A beginners guide for video production, 18:5677 (R;US)
Evaluation program effectiveness of household hazardous waste collection: The Seattle-King County experience, 18:5844 (R;US)
Research unit Energy and Consumers: Progress report, 18:5858 (R;FI;In Finnish)

HOUSES
Electrically heated detached houses with fireplaces fired by indigenous fuels: A nationwide survey conducted in 1988, 18:5804 (R;FI;In Finnish)
Planning of and experience with a solar building implemented by way of efficient and continuously cost-effective technologies, 18:5789 (IA;DE;In German)
Solar building study. Summary report: Spinney Gardens [Crystal Palace, London], 18:5293 (R;GB)
The Oklahoma Field Test: Air-conditioning electricity savings from standard energy conservation measures, radiant barriers, and high-efficiency window air conditioners, 18:5803 (R;US)
The ecological building at Wuerzburg, 18:5774 (IA;DE;In German)
The use of fireplaces fired by indigenous fuels in electrically heated detached houses, 18:5805 (R;FI;In Finnish)

HTGR TYPE REACTORS
Comparing thermal-hydraulic aspects of small modular and medium-sized High-Temperature Gas Reactor plants, 18:5413 (RA;IL)
Dynamic modelling of gas-cooled reactor thermal hydraulics with the DSNP, 18:5414 (RA;IL)
Fission product release following a severe accident in a medium-sized HTGR, 18:5412 (RA;IL)
Modular High Temperature Gas-Cooled Reactor heat source for coal conversion, 18:5411 (R;US)
Proceedings of the 2nd technical meeting on high temperature gas-cooled reactors, 18:5419 (R;JP;In Japanese)
R+D works for the further development of high temperature reactors. (1) Captive bearing experiments for active magnetic bearings. (2) Captive bearing test for HTR blowers. Final report 1.10.1983 - 31.3.1991, 18:5418 (I;DE;In German)
R+D works for the further development of high temperature reactors. Development and testing of a pilot blower with magnetic bearings. Phase 1 - plans ready for construction. Phase 2 - construction and testing. Final report 1.11.1986 - 30.04.1991, 18:5417 (I;DE;In German)

HTO
See TRITIUM COMPOUNDS

HTR REACTOR
Transient analysis in a medium-sized High-Temperature reactor power plant, 18:5415 (RA;IL)

HYDROGEN
Adsorption
High pressure heterogeneous catalysis in a low pressure ultra-high vacuum environment: Summary of progress report, July 1, 1989–December 31, 1992, 18:5937 (R;US)
Interaction of hydrogen with Li_2O surfaces, 18:7285 (RA;US)
Catalytic Combustors
Catalytic combustion of hydrogen, 18:5232 (R;FI;In Finnish)
Charged-Particle Transport
Variation of DOSD moments with bond length in H_2 and N_2, 18:7112 (RA;US)
Chemical Reaction Kinetics
Surface reactions induced and measured by scanning probe microscopy, 18:6155 (RA;US)
Collisions
Bremsstrahlung induced by 50 MeV H^0 bombardment, 18:7117 (RA;US)
Energy loss measurements of He and H scattered at grazing incidence off Ni, 18:7108 (RA;US)
Combustion
Report on the EH special review of occupational safety and health programs for the Hanford high-level waste tanks, 18:5131 (R;US)
Desorption
Desorption characteristics of the $LiAlO_2$-H_2O(g) system, 18:7284 (RA;US)
Dwba
Distorted-wave calculation of He(e,2 e) including core-exchange amplitudes, 18:6996 (R;AU)
Electron-Atom Collisions
Calculation of the total ionization cross section and spin asymmetry in electron-hydrogen scattering from threshold to 500 eV, 18:7067 (R;AU)
Convergent close-coupling calculations of electron-hydrogen scattering, 18:6987 (R;AU)
Cross sections for K-shell ionization by electron impact, 18:7062 (RA;US)
Flammability
Laboratory flammability studies of mixtures of hydrogen, nitrous oxide, and air: Final report, 18:5173 (R;US)
Report on the EH special review of occupational safety and health programs for the Hanford high-level waste tanks, 18:5131 (R;US)
Ionization
Integrated cross sections for the ionisation of atomic hydrogen by electron impact, 18:7066 (R;AU)
Line Broadening
Inverse Raman spectroscopy measurements of line-shift coefficients in hydrogen perturbed by argon, 18:6193 (R;US)
Materials Recovery
Hydrogen separation by ceramic membranes in coal gasification, 18:4869 (R;US)
Metallurgical Effects
The effect of hydrogen, chromium, titanium, and silicon on the ductile-brittle transition temperature of vanadium and vanadium-base alloys, 18:7316 (RA;US)
Quantum Mechanics
Classical and quantum dynamics of the impulsively driven hydrogen atom, 18:7052 (R;US)
Raman Spectroscopy
Inverse Raman spectroscopy measurements of line-shift coefficients in hydrogen perturbed by argon, 18:6193 (R;US)
Separation Processes
Development of hollow-fiber catalytic-membrane reactors for high-temperature gas cleanup, 18:4871 (R;US)
Gas separation with glass membranes: Final report, 18:4865 (R;US)
High-temperature membranes for gas separation and gas cleanup, 18:4849 (R;US)
Hydrogen separation by ceramic membranes in coal gasification, 18:4869 (R;US)
Transition Amplitudes
Distorted-wave calculation of He(e,2 e) including core-exchange amplitudes, 18:6996 (R;AU)

ION-ATOM COLLISIONS
ION-ION COLLISIONS
Multiple electromagnetic pair production in ultrarelativistic heavy ion collisions, 18:7069 (R;DE;In German)
Theory of electron ejection from surfaces by highly charged ion impact, 18:7120 (R;US)

ION CYCLOTRON-RESONANCE HEATING
See ICR HEATING

ION DRIFT
Gyroinvariant second order drift velocities and corresponding guiding centre position: General treatment, 18:7180 (IA;AR)

ION EXCHANGE MEMBRANES
See MEMBRANES

ION IMPLANTATION
Nitrogen implantation in steel with an impulsive ion implanter, 18:7121 (IA;AR)

ION PAIRS
Reactions of metal ions and their clusters in the gas phase using laser ionization: Fourier transform mass spectrometry: Progress report, February 1, 1992–January 31, 1993, 18:6168 (R;US)
Stable clusters in the condensed state and some possibilities for gas phase clusters, 18:7053 (R;US)

ION SCATTERING ANALYSIS
Ion beam-based characterization of multicomponent oxide thin films and thin film layered structures, 18:6089 (R;US)

ION SOURCES
See also PENNING ION SOURCES
Negative ion extraction characteristics of a large negative ion source with double-magnetic filter configuration, 18:7406 (R;JP)
Production of negative hydrogen ions in a large multicusp ion source with double-magnetic filter configuration, 18:7405 (R;JP)

ION SPECTROSCOPY
Heavy Ion Backscattering Spectrometry for high sensitivity, 18:7095 (R;US)

ION-ATOM COLLISIONS
Differential electron emission in multi-charged ion atom collisions: Systematics for distant and close collisions, 18:7070 (R;US)
Possible two-electron excitations in C^{3+} following 1 MeT/u collisions with atomic targets; Z = 2, 10, 18 and 36, 18:7064 (R;US)
Study of the elastoplasticity of nuclear matter and its influence on the dynamics of heavy ion collisions by the method of the δ electron spectroscopy, 18:7001 (R;DE;In German)
[Electron transfer, ionization, and excitation in atomic collisions]: Progress report, 18:7065 (R;US)

ION-ION COLLISIONS
[Electron transfer, ionization, and excitation in atomic collisions]: Progress report, 18:7065 (R;US)

ION-SELECTIVE ELECTRODES
Preparation of solid-membrane ion-selective electrodes by ion implantation, 18:6166 (RA;US)

IONIC REACTIONS

KOVAR
STEELS
A microstructural examination of the mechanical response of FeCrNi alloys irradiated at 365 C using isotope tailoring to produce different He/dpa ratios, 18:7345 (RA;US)
Effect of MOTA shutdown procedure on radiation-induced microstructural evolution, 18:7291 (RA;US)
Helium generation rates in isotopically tailored Fe-Cr-Ni alloys irradiated in FFTF/MOTA, 18:7295 (RA;US)
Implications of neutron spectrum and flux differences on fission-fusion correlations at high neutron fluence, 18:7256 (RA;US)
Microstructures of neutron-irradiated Fe-12Cr-XMn (X=15-30) ternary alloys, 18:7346 (RA;US)
Phase separation in Fe-35Ni during thermal aging at 625C, 18:7302 (RA;US)
Phosphide formation in neutron-irradiated Fe-15Cr-25Ni-P alloys, 18:7303 (RA;US)
Relationship between microstructure, spinodal-like decomposition and selective electropolishing of irradiated INVAR-type alloys, 18:7258 (RA;US)
Silicon's role in determining swelling in neutron-irradiated Fe-Ni-Cr-Si alloys, 18:7304 (RA;US)
The influence of helium on mechanical properties of model austenitic alloys, determined using ^{59}Ni isotopic tailoring and fast reactor irradiation, 18:7299 (RA;US)
Theoretical analysis of phase transformations in Fe-Ni 'INVAR'-type alloys, 18:7259 (RA;US)

IRON CHLORIDES
Semiconductor electrochemistry of coal pyrite: Technical progress report, April–June 1992, 18:6139 (R;US)

IRON COMPOUNDS
See also IRON CHLORIDES
IRON OXIDES
IRON SULFIDES
Effect of Heavy metals on the iron oxidizing ability of Thiobacillus ferrooxidans: Part 1, Effect of silver: Technical progress report, July 1992–September 1992, 18:4886 (R;US)

IRON IONS
Electron impact excitation cross section measurements of highly charged heliumlike and lithiumlike ions, 18:7071 (R;US)
Electron impact ionization of highly charged lithiumlike ions, 18:7076 (R;US)

IRON OXIDES
Advanced Coal Liquefaction Research and Development Facility, Wilsonville, Alabama: Run 262 with Black Thunder subbituminous coal: Technical progress report, 18:4887 (R;US)
Synthesis and reactivity of ultra-fine coal liquefaction catalysts, 18:4896 (R;US)

IRON SULFIDES
Semiconductor electrochemistry of coal pyrite: Technical progress report, April–June 1992, 18:6139 (R;US)
Synthesis and reactivity of ultra-fine coal liquefaction catalysts, 18:4896 (R;US)

IRRADIATION CAPSULES
Calculation of displacement levels for pure elements and most multicomponent alloys irradiated in FFTF MOTA-1F, 18:7339 (RA;US)
Design and fabrication of HFIR-MFE RB* spectrally tailored irradiation capsules, 18:7250 (RA;US)
Development of plastic capsule for research reactor irradiation, 18:6208 (R;JP;In Japanese)
Fabrication and irradiation of HFIR-MFE-JP-17, -18, and -19 irradiation capsules, 18:7334 (RA;US)
Fabrication and irradiation of HFIR-MFE-JP-17, -18, and -19 target irradiation capsules, 18:7293 (RA;US)
Fabrication and operation of HFIR-MFE RB spectrally tailored irradiation capsules, 18:7292 (RA;US)
Fabrication and operation of HFIR-MFE-RB spectrally tailored irradiation capsules, 18:7335 (RA;US)
Fabrication of creep and swelling specimens for MOTA-2B irradiation, 18:7290 (RA;US)
Preparation and irradiation of fusion MOTA 2B, 18:7332 (RA;US)
Status of U.S./Japan collaborative program phase II HFIR target capsules, 18:7333 (RA;US)

IRRADIATION DEVICES

Agriculture
Element content of ruderal weeds used as accumulating indicators in some industrial districts of Hungary, 18:6734 (RA;DE)
Biological Accumulation
Element content of ruderal weeds used as accumulating indicators in some industrial districts of Hungary, 18:6734 (RA;DE)
The effect of different factors on the trace element intake of wheat and corn, 18:6730 (RA;DE)
Biological Effects
Investigation into the influence of heavy metals (especially Cd, Zn) on the cambium activity of Central European forest trees (beech, spruce). Final report, 18:6722 (I;DE;In German)
Decontamination
Macroscopic surface cleaning using a high repetition rate ultraviolet laser, 18:6690 (R;US)
Environmental Exposure
Balancing heavy metals in the Elbe river, 18:6605 (IA;DE;In German)
Environmental Transport
Balancing heavy metals in the Elbe river, 18:6605 (IA;DE;In German)
Ion Collisions
Theory of electron ejection from surfaces by highly charged ion impact, 18:7120 (R;US)
Land Pollution
Element content of ruderal weeds used as accumulating indicators in some industrial districts of Hungary, 18:6734 (RA;DE)
The effect of different factors on the trace element intake of wheat and corn, 18:6730 (RA;DE)
Maize
The effect of different factors on the trace element intake of wheat and corn, 18:6730 (RA;DE)
Physical Radiation Effects
Excimer laser surface modification: Process and properties, 18:5968 (R;US)
Plant Growth
Investigation into the influence of heavy metals (especially Cd, Zn) on the cambium activity of Central European forest trees (beech, spruce). Final report, 18:6722 (I;DE;In German)
Plants
Element content of ruderal weeds used as accumulating indicators in some industrial districts of Hungary, 18:6734 (RA;DE)
Removal
Office of Technology Development integrated program for development of in situ remediation technologies, 18:5199 (R;US)
Preliminary evaluation of selected in situ remediation technologies for Volatile Organic Compound contamination at Arid sites, 18:5196 (R;US)
Risk Assessment
Screening of contaminants in Waste Area Grouping 2 at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 18:6781 (R;US)
Shear Properties
Dissipation in adiabatic shear bands, 18:5981 (R;US)
Soils
Element content of ruderal weeds used as accumulating indicators in some industrial districts of Hungary, 18:6734 (RA;DE)
Sorptive Properties
Role of atomic size and valence in bonding and diffusion at metal surfaces, 18:5984 (R;US)
Toxicity
Toxicological benchmark for screening of potential contaminants of concern for effects on aquatic biota on the Oak Ridge Reservation, Oak Ridge, Tennessee: Environmental Restoration Program, 18:6621 (R;US)
Tree Rings
Investigation into the influence of heavy metals (especially Cd, Zn) on the cambium activity of Central European forest trees (beech, spruce). Final report, 18:6722 (I;DE;In German)
Wheat
The effect of different factors on the trace element intake of wheat and corn, 18:6730 (RA;DE)
METEOROLOGY
An operational procedure for mixing height estimation, 18:6528 (R;DK)
METHANE
Advanced NMR-based techniques for pore structure analysis of coal: Quarterly report No. 3, July 1, 1992–September 30, 1992, 18:4903 (R;US)
Alkane activation and reactivity on iridium, platinum, and ruthenium surfaces, 18:6134 (R;US)
Biomimetic methane oxidation: Synthesis and kinetics, 18:5014 (RA;US)
Development of biological coal gasification (MicGAS) process, 18:4873 (R;US)
High pressure heterogeneous catalysis in a low pressure ultrahigh vacuum environment: Summary of progress report, July 1, 1989–December 31, 1992, 18:5937 (R;US)
Mechanisms and controlling characteristics of the catalytic oxidation of methane: Technical progress report, June 15, 1990–December 14, 1992, 18:4844 (R;US)
Mechanisms of gas permeation through polymer membranes: Summary technical report, September 1991–August 1992, 18:6127 (R;US)
Methane oxidation over dual redox catalysts: Final report, 18:6138 (R;US)
Recovery of high-grade SNG-methane from sewage gas by desulfurization with activated carbon and CH_4/CO_2-separation with CMS-based PSA. Final report, 18:5239 (I;DE;In German)
Sludge storage lagoon biogas recovery and use: Volume 2, 18:5843 (R;US)
Subunit resolution for active site identification of Methylosinus trichosporium OB3b soluble methane monooxygenase, 18:5257 (RA;US)
Theoretical description of biomimetic complexes, 18:5256 (RA;US)
METHANE HYDRATE DEPOSITS
See NATURAL GAS HYDRATE DEPOSITS
METHANOGENIC BACTERIA
Development of biological coal gasification (MicGAS) process, 18:4873 (R;US)
METHANOL
Formation and chemical characteristics of coke deposits in typical hydrocarbon reactions on acid monofunctional zeolite catalysts. Final report, 18:6141 (I;DE;In German)
Modular High Temperature Gas-Cooled Reactor heat source for coal conversion, 18:5411 (R;US)
METHANOL FUELS
Alternative transportation fuels: Financing issues: Options for financing alternative fuel vehicles fleets and infrastructure, 18:5900 (R;US)

MOISTURE
The moisture changes in surface layer of peat and optical measurement of them, 18:4915 (RA;FI;In Finnish)
Utilization of aerial photography in peat production, 18:4842 (R;FI;In Finnish)
MOISTURE GAGES
Advanced moisture sensor research and development: Quarterly progress report, August 1, 1992–October 31, 1992, 18:5816 (R;US)
MOLDS (CASTING)
See CASTING MOLDS
MOLECULAR BEAMS
An electrostatic mirror for neutral polar molecules, 18:6367 (R;AU)
MOLECULAR IONS
Target thickness dependent convoy electron production of aligned molecular HeH^+-ions, 18:7106 (RA;US)
MOLTEN CARBONATE FUEL CELLS
Gasifiers optimized for fuel cell applications, 18:4874 (R;US)
Integration of carbonate fuel cells with advanced coal gasification systems, 18:5768 (R;US)
MOLTEN METAL-WATER REACTIONS
Rapid quenching of molten lithium-aluminum jets in water, 18:5663 (R;US)
MOLYBDENUM
Advanced Coal Liquefaction Research and Development Facility, Wilsonville, Alabama: Run 262 with Black Thunder subbituminous coal: Technical progress report, 18:4887 (R;US)
Grand Junction Projects Office site environmental report for calendar year 1991, 18:5045 (R;US)
Influence of dislocation structure and impurities on void lattice formation in crystals under irradiation, 18:5965 (R;UA)
Monticello Millsite environmental report for calendar year 1991, 18:5186 (R;US)
The morphology of collision cascades as a function of recoil energy, 18:7255 (RA;US)
Thermal stability of Mo/Si multilayers, 18:6161 (RA;US)
MOLYBDENUM 100 TARGET
Investigations of nuclear structure and nuclear reactions induced by complex projectiles: Progress report, September 1, 1991–August 31, 1992, 18:6986 (R;US)
MOLYBDENUM ALLOYS
See also MOLYBDENUM BASE ALLOYS
STEEL-CR9MONBV
Implications of neutron spectrum and flux differences on fission-fusion correlations at high neutron fluence, 18:7256 (RA;US)
Microstructural examination of simple vanadium alloys irradiated in the FFTF/MOTA, 18:7274 (RA;US)
New developments in the "ab initio" determination of transition metal alloy phase diagrams, 18:5974 (R;US)
Non-equilibrium structures induced by ion irradiation in Ni_4Mo, 18:5920 (R;US)
Studies of the omega phase transformation in the titanium-molybdenum alloy system, 18:5989 (RA;US)
MOLYBDENUM BASE ALLOYS
Influence of dislocation structure and impurities on void lattice formation in crystals under irradiation, 18:5965 (R;UA)
MOLYBDENUM NITRIDES
New pathways to tungsten and molybdenum oxides, nitrides and azides, 18:6018 (R;US)
MOLYBDENUM SULFIDES
Ethanol synthesis and water gas shift over bifunctional sulfide catalysts: Technical progress report, June 1992–August 1992, 18:4893 (R;US)
Sputter-deposition and characterization of molybdenum disulfide thin films, 18:6054 (R;US)
MOMENTUM TRANSFER
Momentum transfer from flowing explosive gases to spherical particles during computer simulation of blasting-induced rock motion, 18:5023 (R;US)
MONITOR CODES

NEUTRON PROBES
APSTNG: Neutron interrogation for detection of drugs and other contraband, 18:6379 (R;US)

NEUTRON REACTIONS
A comparison of WIMS-D4 and WIMS-D4m generated cross-section data with Monte Carlo, 18:5444 (R;US)
A review of the associated particle imaging technique, 18:7091 (R;US)
COMNUCCASCADE: Compound nucleus reaction, 18:7460 (CM;US)
Calculation of nucleon-deuteron breakup processes with realistic, charge-dependent potential, 18:6994 (R;DE;In German)
Cross section parameterization in the resolved resonance region, 18:6995 (R;US)
Sensitivity of fission-product neutron absorption to ENDF/B-IV, -V, and -VI nuclear data parameters, 18:7018 (R;US)

NEUTRON REFLECTORS
Comparison of kinematic and optical matrix methods for calculating reflectivity profiles of solid thin films and multilayers, 18:7049 (R;GB)

NEUTRON SOURCES
ALPHN: A computer program for calculating (α, n) neutron production in canisters of high-level waste, 18:5168 (R;US)
Dense plasma focus powered by flux compression generators, 18:5226 (R;US)
Ice targets for use at NTOF, 18:7014 (R;US)

NEUTRON SPECTRA
A suggestion for specification of the neutron energy scale in measurements, analyses and evaluations of differential reaction cross-section data, 18:6989 (R;US)

NEUTRON TRANSPORT
Biases in Monte Carlo eigenvalue calculations, 18:5443 (R;US)
Comparison of first-principles MCNP calculations of NaI and BGO detector response functions to measurements, 18:6424 (R;US)
Development of BERMUDA: a radiation transport code system, 1: Neutron transport codes, 18:7479 (R;JP)

NEUTRON TRANSPORT THEORY
See also MULTIGROUP THEORY
Application of synthetic diffusion method in the numerical solution of the equations of neutron transport in slab geometry., 18:7047 (I;MX;In Spanish)
Neutron wave reflexions in interface media with transport equation P_1 approximation, 18:7046 (I;BR;In Portuguese)
Verification, validation, and benchmarking report for GILDA: An infinite lattice diffusion theory calculation, 18:7051 (R;US)

NEUTRON-NEUTRON INTERACTIONS
Calculation of nucleon-deuteron breakup processes with realistic, charge-dependent potential, 18:6994 (R;DE;In German)

NEUTRON-RICH ISOTOPES
Measurement of level lifetimes in the ps range and model interpretations for neutron-rich A $\simeq$ 100 nuclei, 18:6980 (R;DE)

NEUTRONS
See also RESONANCE NEUTRONS
THERMAL NEUTRONS
Comparison of kinematic and optical matrix methods for calculating reflectivity profiles of solid thin films and multilayers, 18:7049 (R;GB)
Data reduction and analysis programs for neutron reflection studies of monolayer adsorption at interfaces, 18:7048 (R;GB)
Large contribution to the neutron electric dipole moment from a dimension six four quark operator, 18:6908 (R;AU)
Possibility of neutron electric form factor etermination in the d-vector(e,e'p-vector)n reaction, 18:7013 (R;UA;In Russian)
Relativistic corrections to the neutron electric dipole moment in valence quark models, 18:6912 (R;AU)
Study of secondary neutron production in π^--Xe-interactions at 3.5 GeV/c, 18:7012 (R;RU;In Russian)

NEVADA
Field activities near the Shoal Site, Sand Springs Range, Nevada, 18:6569 (R;US)

NICKEL
An investigation of catalytic active phase-support interactions by IR, NMR and x-ray absorption spectroscopies: Progress report, January 15, 1992–September 15, 1992, 18:6130 (R;US)
Covalent nitrides for maskless laser writing of microscopic metal lines, 18:6259 (R;US)
Cross sections for K-shell ionization by electron impact, 18:7062 (RA;US)
Dosimetry measurements for PNL experiments 12-14 in the Omega West Reactor, 18:7253 (RA;US)
Electronic response of metal surfaces to electron exchange with doubly charged ions, 18:7109 (RA;US)
Energy loss measurements of He and H scattered at grazing incidence off Ni, 18:7108 (RA;US)
Helium production rates in the LASREF Facility, 18:7296 (RA;US)
High pressure heterogeneous catalysis in a low pressure ultra-high vacuum environment: Summary of progress report, July 1, 1989–December 31, 1992, 18:5937 (R;US)
Magnetic structures of nanometer scale Dy, Cr and Ni, 18:5919 (R;US)
Optical constants from mirror reflectivities measured at synchrotrons, 18:5969 (R;US)
Physisorption of deuterium on deuterated nickel clusters, 18:6180 (R;US)
Surface melting in Ni_{55}, 18:5913 (R;US)

NICKEL 64 REACTIONS
Investigations of nuclear structure and nuclear reactions induced by complex projectiles: Progress report, September 1, 1991–August 31, 1992, 18:6986 (R;US)

NICKEL ALLOYS
See also CHROMIUM-NICKEL STEELS
KOVAR
NICKEL BASE ALLOYS
A first-principles study of phase stability in nickel-aluminum alloys, 18:6157 (RA;US)
A microstructural examination of the mechanical response of FeCrNi alloys irradiated at 365 C using isotope tailoring to produce different He/dpa ratios, 18:7345 (RA;US)
Density changes of generation 1.5 and 2.0 copper alloys irradiated at 411-414°C and 529°C in FFTF-MOTA, 18:7278 (RA;US)
Effect of MOTA shutdown procedure on radiation-induced microstructural evolution, 18:7291 (RA;US)
Helium generation rates in isotopically tailored Fe-Cr-Ni alloys irradiated in FFTF/MOTA, 18:7295 (RA;US)
Implications of neutron spectrum and flux differences on fission-fusion correlations at high neutron fluence, 18:7256 (RA;US)
Microstructural investigation of swelling dependence on nickel content in fast-neutron irradiated Fe-Cr-Ni austenitic ternaries, 18:7260 (RA;US)
Phase separation in Fe-35Ni during thermal aging at 625C, 18:7302 (RA;US)
Phosphide formation in neutron-irradiated Fe-15Cr-25Ni-P alloys, 18:7303 (RA;US)
Relationship between microstructure, spinodal-like decomposition and selective electropolishing of irradiated INVAR-type alloys, 18:7258 (RA;US)
Response of solute and precipitation strengthened copper alloys at high neutron exposure, 18:7356 (RA;US)
Silicon's role in determining swelling in neutron-irradiated Fe-Ni-Cr-Si alloys, 18:7304 (RA;US)
Tensile and fracture behavior of Cu-5Ni and various precipitation-strengthened copper alloys after high fluence irradiation, 18:7357 (RA;US)
The influence of helium on mechanical properties of model austenitic alloys, determined using ^{59}Ni isotopic tailoring and fast reactor irradiation, 18:7299 (RA;US)

Theoretical analysis of phase transformations in Fe-Ni 'INVAR'-type alloys, 18:7259 (RA;US)

NICKEL BASE ALLOYS
Corrosion tests of high-alloy stainless steels and nickel alloys in natural sea water under flowing conditions. Final report, 18:5948 (I;DE;In German)
Microstructural evolution of neutron-irradiated Ni-Si and Ni-Al alloys, 18:7347 (RA;US)
Neutron-induced swelling of binary Ni-Al alloys, 18:7301 (RA;US)
Non-equilibrium structures induced by ion irradiation in Ni_4Mo, 18:5920 (R;US)
The behavior of intermetallic compounds at large plastic strains, 18:5972 (R;US)

NICKEL IONS
Spectroscopy of highly-ionized atoms using positiion-sensitive detection, 18:7054 (R;US)

NICKEL NITRIDES
Covalent nitrides for maskless laser writing of microscopic metal lines, 18:6259 (R;US)

NICKEL OXIDES
Correlations between surface structure and catalytic activity/selectivity: Progress report, January 1, 1992–December 31, 1992, 18:6133 (R;US)

NICKEL-CHROMIUM STEELS
Corrosion tests of high-alloy stainless steels and nickel alloys in natural sea water under flowing conditions. Final report, 18:5948 (I;DE;In German)
The effect of helium on microstructural evolution and mechanical properties of austenitic steels as determined by spectral tailoring experiments, 18:7310 (RA;US)

NIOBIUM
Experimental and theoretical determination of the atomic structure of the (310) twin in niobium, 18:6159 (RA;US)
Oscillatory interlayer magnetic coupling of sputtered Fe/Nb superlattices, 18:5915 (R;US)
The real-space multiple-scattering theory and the electronic structure of grain boundaries, 18:6160 (RA;US)

NIOBIUM ALLOYS
Fatigue behavior of U-6Nb alloys, 18:5992 (RA;US)
Superconductive materials.: Processing technology and measurement of characteristics, 18:5945 (IA;JP;In Japanese)

NITRIC ACID
Development of sampling techniques suitable in field applications for the speciation of chemically and hygienically relevant atmospheric pollutants: nitric acid and hydrogen peroxide. Final report, 18:6489 (I;DE;In German)

NITRIC OXIDE
Design of a periodically operated SCR reactor, 18:5373 (RA;DE;In German)
Selective catalytic reduction of nitrogen monoxide with ammonia under periodically changing reaction conditions using a zeolite catalyst, 18:5374 (RA;DE;In German)
Simultaneous dry scrubbing of SO_2 and catalytic NO_x reduction using activated calcium based materials, 18:5375 (RA;DE;In German)
Smog chamber investigation of the photochemical conversion and formation of air pollutants from NO_x, hydrocarbons and sulphur dioxide, 18:6513 (RA;DE;In German)
Stark quantum-beat spectroscopy: The electric dipole moment of NO ($A\ ^2\Sigma^+$), 18:7074 (R;US)

NITROGEN
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering: Final technical report, 18:6093 (R;US)
Gas separation with glass membranes: Final report, 18:4865 (R;US)
Lithium purification at temperature below 500 C, 18:7363 (RA;US)
Low-cost ceramic membranes and supports for gas separation, 18:4845 (R;US)
Measurements and modeling of advanced coal conversion processes, 18:4852 (R;US)
Variation of DOSD moments with bond length in H_2 and N_2, 18:7112 (RA;US)

NITROGEN COMPOUNDS
See also ISOCYANIC ACID
NITROGEN OXIDES
Migration of pollutants in a saturated aquifer: A theoretical and experimental approach, 18:6594 (R;FI)

NITROGEN DIOXIDE
Development and application of a quasi-continuously working system for measuring the immission of acid air pollutants like HCl, NO_2 and SO_2 using a dry absorber tube, 18:6511 (RA;DE;In German)
Nitrogen oxides in Swedish urban areas - exposure status, 18:6500 (R;SE;In Swedish)

NITROGEN IONS
The neutralization process of highly charged ions near a metal surface, 18:7111 (RA;US)

NITROGEN NITRIDES
See NITROGEN

NITROGEN OXIDES
See also NITRIC OXIDE
NITROGEN DIOXIDE
NITROUS OXIDE
Characterization of surfactant apoproteins after damage of alveolar tissue caused by exposure with NO_x, and their pathogenetic role in toxic lung damage, 18:6770 (RA;DE;In German)
Coal reburning for cyclone boiler NO_x control demonstration: Quarterly report No. 9, April, May, and June 1992, 18:4948 (R;US)
Demonstration of selective catalytic reduction (SCR) technology for the control of nitrogen oxide (NO_x) emissions from high-sulfur coal-fired boilers: Quarterly report No. 8, April–June, 1992, 18:5363 (R;US)
Development of advanced NO_x control concepts for coal-fired utility boilers: Quarterly technical progress report no. 6, January 1, 1992–March 31, 1992, 18:4954 (R;US)
Enhancing the use of coals by gas reburning-sorbent injection: Quarterly report No. 20, July 1–September 30, 1992, 18:4947 (R;US)
Mexico City air quality: Progress of an international collaborative project to define air quality management options, 18:6525 (R;US)
Nitrous oxide adsorption on DeNOx-ing catalysts, 18:5372 (R;IT)
Scandinavian plants with NO_x control installations, 18:6550 (R;SE;In Swedish)
Studies of tracheal mucus secretion in correlation to morphologic changes on the levels of central and peripheral airways and lung tissue in the rat after exposure to low concentrations of the air pollutants SO_2 and NO_2, 18:6778 (RA;DE;In German)
The reduction of NO_x by HNCO, 18:6526 (R;US)
US Department of Energy first annual clean coal technology conference: Proceedings, 18:4836 (R;US)
[Industrial pulverized coal low NO_x burner, Phase I] technical progress report, April 1, 1992–June 30, 1992, 18:5370 (R;US)

NITROUS OXIDE
Laboratory flammability studies of mixtures of hydrogen, nitrous oxide, and air: Final report, 18:5173 (R;US)
Minutes of the Tank Waste Science Panel Meeting March 25–27, 1992: Hanford Tank Safety Project, 18:5170 (R;US)
[Infrared tunable difference frequency laser source]: Final technical report, September 15, 1990–September 14, 1992, 18:6094 (R;US)

NITROXYL RADICALS
Reactions of NO_3/N_2O_5 with biogenic organic hydrocarbons. Final report, 18:6484 (I;DE;In German)

NMR SPECTROMETERS
Ripeness sensor development: Final report, 18:5818 (R;US)

RODS (FUEL)
See FUEL RODS

ROOFS
Development trends of glazed facades and roofs, 18:5811 (R;FI;In Finnish)

Moisture effects in low-slope roofs: Drying rates after water addition with various vapor retarders, 18:5801 (R;US)
Structural evaluation for glazed structures: Methods and test results, 18:5810 (R;FI;In Finnish)
Temperatures of two glazed roofs, 18:5809 (R;FI;In Finnish)

ROOTS
Growth and element content of fine roots of spruces on soils in the calcareous Northern Alps (Wank), 18:6752 (RA;DE;In German)

ROTATING PLASMA
Cyclotron and drift instabilities of rotating plasma, 18:7211 (R;UA;In Russian)
Ion cyclotron turbulence of rotating plasma, 18:7212 (R;UA;In Russian)
Theory of nonlinear interaction of potential oscillations of radially homogeneous rotating plasma, 18:7210 (R;UA;In Russian)

ROTORS
Feasibility study of teetered, stall-regulated rotors, 18:5321 (R;GB)

RUBIDIUM 81
Production of ^{43}K and $^{18, 82m, 83, 84}$Rb isotopes at the Debrecen cyclotron for ecological purposes, 18:6182 (RA;DE)

RUBIDIUM 82
Production of ^{43}K and $^{18, 82m, 83, 84}$Rb isotopes at the Debrecen cyclotron for ecological purposes, 18:6182 (RA;DE)

RUBIDIUM 83
Production of ^{43}K and $^{18, 82m, 83, 84}$Rb isotopes at the Debrecen cyclotron for ecological purposes, 18:6182 (RA;DE)

RUBIDIUM 84
Production of ^{43}K and $^{18, 82m, 83, 84}$Rb isotopes at the Debrecen cyclotron for ecological purposes, 18:6182 (RA;DE)

RUNOFF
The effect of climate change on the hydrology and material fluxes of forested catchments, 18:6624 (RA;FI)

RUTHENIUM
Alkane activation and reactivity on iridium, platinum, and ruthenium surfaces, 18:6134 (R;US)
Correlations between surface structure and catalytic activity/selectivity: Progress report, January 1, 1992–December 31, 1992, 18:6133 (R;US)

RUTHENIUM COMPLEXES
Electrocatalytic oxidations of pyridine derivatives using Ru(IV) poly pyridine complex, 18:6145 (I;BR;In Portuguese)
Photoinduced electron transfer reactions in zeolite cages: Progress report, January 15, 1990–August 1, 1992, 18:6169 (R;US)

RUTILE
X-ray diffraction study of shock-modified tetragonal phases of SnO_2 and MnO_2, 18:6027 (R;US)

S

S CODES
Development of the Symbolic Manipulator Laboratory modeling package for the kinematic design and optimization of the Future Armor Rearm System robot: Ammunition Logistics Program, 18:6216 (R;US)
RE/SPEC Inc. technical support to the Repository Technology Program: Summary of activities for September 1, 1988–June 30, 1992, 18:5128 (R;US)
SEVERO code - user's manual, 18:7442 (R;BR;In Portuguese)
SHIELD verification and validation report, 18:5604 (R;US)
SPIRT-NRC: Containment spray iodine removal, 18:7476 (CM;US)

SAFETY (REACTOR)
See REACTOR SAFETY

SAFETY ENGINEERING
111th meeting for research of safety engineering, 18:6476 (I;JP;In Japanese)

SALINE ZONE

SALT CAVERNS
Formation and fate of gases in the caverns of a repository in salt rock. Status report, 18:5145 (R;DE;In German)
Studies of the behaviour of backfill taking into account the interaction between rock and backfill, and other sealing components at a salina repository. Final report, 18:5149 (I;DE;In German)

SALT DEPOSITS
Studies of the behaviour of backfill taking into account the interaction between rock and backfill, and other sealing components at a salina repository. Final report, 18:5149 (I;DE;In German)

SALT TRANSPORT PROCESS
See PYROCHEMICAL REPROCESSING

SALTS
Methods for predicting properties and tailoring salt solutions for industrial processes, 18:6124 (R;US)

SAMARIUM
Application of high-resolution laser spectroscopy to the monitoring of vapor-phase metals, 18:5204 (R;US)

SAMARIUM 148 TARGET
Investigations of nuclear structure and nuclear reactions induced by complex projectiles: Progress report, September 1, 1991–August 31, 1992, 18:6986 (R;US)

SAND
Potential alkali-reactivity of Torre Lago (Italy) sand, 18:6243 (R;IT;In Italian)

SANDIA LABORATORIES
Final Environmental Impact Statement and Environmental Impact Report for continued operation of Lawrence Livermore National Laboratory and Sandia National Laboratories, Livermore: Volume 3, Appendices F–M, 18:6564 (R;US)
Final Environmental Impact Statement and Environmental Impact Report for continued operation of Lawrence Livermore National Laboratory and Sandia National Laboratories, Livermore: Volume 1, Text, 18:6562 (R;US)
Final Environmental Impact Statement and Environmental Impact Report for continued operation of Lawrence Livermore National Laboratory and Sandia National Laboratories, Livermore: Executive summary, 18:6470 (R;US)
Final Environmental Impact Statement and Environmental Impact Report for continued operation of Lawrence Livermore National Laboratory and Sandia National Laboratories, Livermore: Volume 4, Comments and responses, 18:6565 (R;US)
Final Environmental Impact Statement/Environmental Impact Report for continued operation of Lawrence Livermore National Laboratory and Sandia National Laboratories, Livermore: Volume 2, Appendices A–D, 18:6563 (R;US)
How false starts, redirection, and major interruptions impact TQM efforts (or, surviving real life), 18:7431 (R;US)
Sandia Technology engineering and science accomplishments: Volume 15, No. 1, 18:5734 (R;US)

SANDSTONES
The effect of lamination angle on polymer retention: FY92 annual research plan, 18:4982 (R;US)

SANITARY LANDFILLS
Experimental investigations of the geomechanical behaviour of plastic sealing sheets for sealing dumps. Final report, 18:6070 (R;DE;In German)
Leaching properties of substances from marine-deposited combustion wastes, 18:6583 (R;DK;In Danish)
Results of the radiological survey at the Town of Tonawanda Landfill, Tonawanda, New York (TNY001), 18:6587 (R;US)

SAPPHIRE
Fracture at Cu/sapphire interfaces, 18:5971 (R;US)

SATELLITES
See also MOON
Hypervelocity impact tests and simulations of single Whipple bumper shield concepts at 10 km/s, 18:6250 (R;US)

SAVANNAH RIVER
Analysis of Iodine-129 in aqueous samples by inductively coupled plasma-mass spectrometry, 18:6120 (R;US)

SAVANNAH RIVER PLANT
AEC research programs in support of Savannah River, 18:5495 (R;US)
Communicating science: Volume 2, Annual report for the period ending July 31, 1990, 18:6590 (R;US)
Constant extension rate testing of Type 304L stainless steel in simulated waste tank environments, 18:5177 (R;US)

Final wash precipitate feed simulants for DWPF Cold Chemical Runs, 18:5178 (R;US)
Progress in the environmental restoration at the Savannah River Site (SRS): Revision 1, 18:6596 (R;US)
Reactor-shutdown by earthquakes, 18:5613 (R;US)
Report on visit to Argonne Laboratory, March 8–9, 1953, 18:5142 (R;US)
Use of Government supply sources at the Savannah River Site, 18:7423 (R;US)
Westinghouse Hanford Company Conduct of Operations Manual: GOCO Cross-Cultivation Committee, Operational Excellence Task Force, 18:7436 (R;US)

SILICON SEMICONDUCTOR DETECTORS
See SI SEMICONDUCTOR DETECTORS
SILICON SOLAR CELLS
Low-temperature emitter-passivation for silicon solar cells, 18:5274 (R;US)
Second workshop role of point defects/defect complexes in silicon device fabrication: Book of abstracts, 18:5272 (R;US)
Spin dependent photocurrents in ribbon solar cells, 18:5275 (R;US)
Status of photovoltaic technology. Crystalline silicon solar cells, 18:5271 (IA;DE)
SILICOSIS
See PNEUMOCONIOSES
SILVER
Effect of Heavy metals on the iron oxidizing ability of Thiobacillus ferrooxidans: Part 1, Effect of silver: Technical progress report, July 1992–September 1992, 18:4886 (R;US)
Interaction of low-energy electrons and positrons with condensed matter: Stopping powers and inelastic mean free paths from optical data, 18:7119 (RA;US)
Preparation of solid-membrane ion-selective electrodes by ion implantation, 18:6166 (RA;US)
The morphology of collision cascades as a function of recoil energy, 18:7255 (RA;US)
SILVER 110
Neutron activation analysis of monolithic ceramics and ceramic composites, 18:7297 (RA;US)
SINGLE CRYSTALS
See MONOCRYSTALS
SIS SYNCHROTRON
Development of a fragment detector system for the study of peripheral collisions at high beam energies, 18:6403 (R;DE;In German)
SITE CHARACTERIZATION
A hyperspectral image analysis workbench for environmental science applications, 18:7437 (R;US)

Commercially available broadband electromagnetic systems for US Department of Energy waste-site characterization, 18:6566 (R;US)

SITE REHABILITATION
See REMEDIAL ACTION

SLAGS
Coal ash behavior in reducing environments, 18:4851 (R;US)
Future trends in the processing of uranium slag generated during production of uranium metal, 18:5057 (IA;IN)
Thermal conductivity of coal ashes and slags, 18:4898 (R;US)

SLC DETECTORS
See STANFORD LINEAR COLLIDER DETECTOR

SLIGHTLY ENRICHED URANIUM
Environmental Assessment for the shipment of low enriched uranium billets to the United Kingdom from the Hanford Site, Richland, Washington (Hanford,WA to the U.K.), 18:5112 (R;US)

SLUDGES
Characterization summary report for pond waste commercial disposal project: Environmental Restoration Program, 18:5143 (R;US)
Field study of disposed wastes from advanced coal processes: Quarterly technical progress report, February 1992–April 1992, 18:4909 (R;US)
Sludge storage lagoon biogas recovery and use: Volume 2, 18:5843 (R;US)

SLUGS (FUEL)
See FUEL RODS

SLURRIES (FUEL)
See FUEL SLURRIES

SMELTING
Collection and conversion of silicon furnace waste gas into higher value products: Phase 2, Experimentation: Final report, 18:5941 (R;US)

SMOG
Prediction of advected smog for the SO_2-early warning-system of the Federal Environmental Agency of Germany (Umweltbundesamt), 18:6504 (R;DE;In German)

SMP DEVICES
See SCANNING MEASURING PROJECTORS

SODIUM
Spin-dependent observables in electron-sodium scattering calculated using the coupled-channel optical method, 18:6997 (R;AU)
q-dependent excitations of metal spheres, 18:7105 (RA;US)

SODIUM CHLORIDES
Multiphonon energy exchange in the collision of an atom with a surface, 18:7107 (RA;US)

SODIUM CITRATES
See SODIUM COMPOUNDS

SODIUM COMPOUNDS
See also SODIUM CHLORIDES
SODIUM OXIDES
SODIUM SILICATES
SODIUM SULFIDES
SODIUM TELLURIDES
Electrokinetic remediation of unsaturated soils, 18:5202 (R;US)

SODIUM IODIDE DETECTORS
See NAI DETECTORS

SODIUM IONS
Transient adsorption, energy loss, and momentum transfer in low velocity ion surface scattering, 18:7110 (RA;US)

SODIUM LAURYL SULFATES
See SODIUM COMPOUNDS

SODIUM OXIDES
Catalytic gasification fundamentals, 18:4895 (R;US)

SODIUM PHOSPHIDES
See SODIUM COMPOUNDS

SODIUM SILICATES
Development Test 105-558-E: Evaluation of high Na_2O neutralization in activated silica preparation, 18:5516 (R;US)

SODIUM SULFIDES
Semiconductor electrochemistry of coal pyrite: Technical progress report, April–June 1992, 18:6139 (R;US)

SODIUM TELLURIDES
Liquid tellurides: Structure and properties, 18:6037 (R;US)

SODIUM-SULFUR BATTERIES
Environmental, health, and safety issues of sodium-sulfur batteries for electric and hybrid vehicles: Volume 4, In-vehicle safety, 18:5892 (R;US)

SODIUM-WATER REACTIONS
See MOLTEN METAL-WATER REACTIONS

SOFC
See SOLID ELECTROLYTE FUEL CELLS

SOFT X RADIATION
The Soft X-ray real time fast trigger system, 18:7203 (R;GB)

SOILS
Air Pollution
Dynamics of humins in polluted forest stands in the Fichtelgebirge (Germany), 18:6754 (RA;DE;In German)
Dynamics of water and nutrients in soils of the 'Wank' (Bavarian Alps), 18:6751 (RA;DE;In German)
Buildup
Accumulation of pesticides and chlorinated hydrocarbons in brown forest soils, 18:6739 (RA;DE)
Chemical Analysis
DOE methods for evaluating environmental and waste management samples, 18:6087 (R;US)
Decontamination
Subsurface Interim Measures/Interim Remedial Action Plan and Decision Document for the 903 Pad, Mound, and East Trenches Areas (Operable Unit No. 2): Public comment, Responsiveness summary: Final, 18:5184 (R;US)
Land Pollution
Soil and water pollution, 18:6554 (I;DE;In German)
Leaching
Dynamics of humins in polluted forest stands in the Fichtelgebirge (Germany), 18:6754 (RA;DE;In German)
Nutrients
Dynamics of water and nutrients in soils of the 'Wank' (Bavarian Alps), 18:6751 (RA;DE;In German)
Organic Chlorine Compounds
Accumulation of pesticides and chlorinated hydrocarbons in brown forest soils, 18:6739 (RA;DE)
Permeability
Functional requirements of the borrow area and haul route for the Waste Area Grouping projects at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 18:5193 (R;US)
Radionuclide Migration
White Oak Creek Embayment time-critical CERCLA removal action sediment-retention structure: Environmental Restoration Program, 18:6586 (R;US)
White Oak Creek embayment sediment retention structure: The Oak Ridge model in action, 18:6556 (R;US)
Radon 222
Survey of radon in the commune of Kristianstad, 18:6579 (R;SE;In Swedish)
Survey of radon in the commune of Lund, 18:6581 (R;SE;In Swedish)
Survey of radon in the commune of Svedala, 18:6580 (R;SE;In Swedish)
Remedial Action
Electrokinetic remediation of unsaturated soils, 18:5202 (R;US)
Office of Technology Development integrated program for development of in situ remediation technologies, 18:5199 (R;US)
Preliminary evaluation of selected in situ remediation technologies for Volatile Organic Compound contamination at Arid sites, 18:5196 (R;US)
Sampling
Analysis of K-Area core samples for K-Area formation stabilization work, 18:5602 (R;US)
DOE methods for evaluating environmental and waste management samples, 18:6087 (R;US)
Results of the radiological survey at 27 Schlosser Drive, Rochelle Park, New Jersey (RJ004), 18:5061 (R;US)
Results of the radiological survey at 31 Schlosser Drive, Rochelle Park, New Jersey (RJ003), 18:5062 (R;US)

Results of the radiological survey at 37 Schlosser Drive, Rochelle Park, New Jersey (RJ002), 18:5063 (R;US)
Results of the radiological survey at the Town of Tonawanda Landfill, Tonawanda, New York (TNY001), 18:6587 (R;US)
Separation Processes
Hanford Site physical separations CERCLA treatability test plan, 18:5136 (R;US)

SOLAR ARCHITECTURE
Solar building study. Summary report: Spinney Gardens [Crystal Palace, London], 18:5293 (R;GB)

SOLAR CELL RECEIVERS
See SOLAR RECEIVERS

SOLAR CELLS
See also SILICON SOLAR CELLS
Measurement uncertainty analysis techniques applied to PV performance measurements, 18:5273 (R;US)
Solar cells and modules, 18:5269 (IA;DE;In German)

SOLAR COLLECTORS
See also FLAT PLATE COLLECTORS
Calculation of the output of Aidt solar heating system's low flow prototype with an electric cartridge, 18:5303 (R;DK;In Danish)
Further development of collectors to generate process heat in the temperature range up to 200 deg C, 18:5301 (IA;DE;In German)
In the test chamber: A facade-integrated air-collector latent-storage system for space heating, 18:5787 (IA;DE;In German)
Large-series production of high-efficiency solar collectors, 18:5781 (IA;DE;In German)
Method to determine the performance of thermal solar collectors in out-door applications, 18:5299 (IA;DE;In German)
Optical efficiencies of flat-plate-type and evacuated-tube-type collectors in a comparative study, 18:5302 (IA;DE;In German)
Optimization of the total efficiency of solar domestic-water heating systems, 18:5300 (IA;DE;In German)
Solar thermal processes - state of the art and new developments, 18:5772 (IA;DE;In German)
Standardization in solar energy technology and engineering, 18:5298 (IA;DE;In German)
The ecological building at Wuerzburg, 18:5774 (IA;DE;In German)

SOLAR CONCENTRATORS
The status of photovoltaic concentrator development, 18:5307 (R;US)

SOLAR COOLING SYSTEMS
See also SOLAR REFRIGERATORS
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems: Project status report, March–November 1992, 18:5289 (R;US)

SOLAR CORONA
Theory of coronal streamer formation, 18:6842 (R;US)

SOLAR ENERGY
Measuring and evaluation of heat storage tank in Hoerby, 18:5309 (R;DK;In Danish)

SOLAR FLARES
Magnetic reconnection and current-sheet formation at x-type neutral points, 18:6835 (R;US)
Theory of coronal streamer formation, 18:6842 (R;US)

SOLAR HEAT ENGINES
Development of CPG dish-Stirling systems for remote power applications, 18:5288 (R;US)

SOLAR HEATING SYSTEMS
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems: Project status report, March–November 1992, 18:5289 (R;US)
'Low flow' - options and limits in a system development, 18:5784 (IA;DE;In German)

SOLAR NEUTRINOS
Latest results from the Soviet-American gallium experiment, 18:6940 (R;US)
Physics studies with ICARUS and a hybrid ionization and scintillation fiber detector, 18:6383 (R;US)
Results from the Soviet-American gallium experiment, 18:6939 (R;US)
The GALLEX solar neutrino experiment, 18:6833 (R;US)

SOLAR POWER PLANTS
See also PHOTOVOLTAIC POWER PLANTS
SOLAR THERMAL POWER PLANTS
High-efficient line converter in 'Hybrid-Concept', 18:5285 (R;CH;In German)

SOLAR RADIATION
The moisture changes in surface layer of peat and optical measurement of them, 18:4915 (RA;FI;In Finnish)

SOLAR RECEIVERS
The USDOE Reflux Receiver Development Program, 18:5306 (R;US)

SOLAR REFRIGERATORS
Solar ice-pack freezer and refrigerator, 18:5290 (R;DK)

SOLAR STILLS
Solar evaporation of fertilizers/ag-chemical aqueous mixtures, 18:5297 (R;US)

SOLAR THERMAL POWER PLANTS
System comparison and potential of solar thermal power plants in the Mediterranean. Preliminary study. Main report, 18:5287 (I;DE;In German)
System comparison and potential of solar thermal power plants in the Mediterranean (Phase 1). Short version, 18:5286 (I;DE;In German)
System comparison and potential of solar thermal power plants in the Mediterranean. Preliminary study. Main report, 18:5287 (I;DE;In German)

SOLAR THERMAL RECEIVERS
See SOLAR RECEIVERS

SOLAR WATER HEATERS
Colorado State University program for developing, testing, evaluating and optimizing solar heating and cooling systems: Project status report, March–November 1992, 18:5289 (R;US)
Small low flow solar heating systems: Experience from practice, 18:5292 (R;DK)
The thermal performance of small low flow solar heating systems, 18:5304 (R;DK)

SOLENOIDS
Electromagnetic finite element analysis of a solenoid, 18:6454 (R;US)
Modeling the APLE injector solenoid magnetic field with the Biot-Savart Law, 18:6266 (R;US)

SOLID ELECTROLYTE FUEL CELLS
Recent progress in zirconia-based fuel cells for power generation, 18:5769 (R;US)
Subtask 6: Recommended practices for powder characterization: IEA Programme on Advanced Fuel Cells, Annex 2: Modelling and evaluation of Solid Oxide Fuel Cells, 18:5770 (R;NL)

SOLID FUELS
Nordic seminar on combustion and gasification reactivities of solid fuels, 18:4958 (R;DK)

SOLID SCINTILLATION DETECTORS
See also NAI DETECTORS
Comparison of first-principles MCNP calculations of NaI and BGO detector response functions to measurements, 18:6424 (R;US)

SOLID WASTES
See also MINERAL WASTES
SCRAP
TAILINGS
WOOD WASTES
Maintenance Implementation Plan for solid waste, 18:5176 (R;US)
Modeling of hydrologic conditions and solute movement in processed oil shale waste embankments under simulated climatic conditions: Second quarterly report, January 1, 1992–March 31, 1992, 18:5025 (R;US)
Multifamily recycling programs: Program data and implementation guidelines: Multifamily recycling in San Diego, California, and Portland, Oregon, 18:5839 (R;US)
Recycling and composting demonstration projects for the Memphis region, 18:5840 (R;US)
Solid waste integrated cost analysis model: 1991 project year report: Part 2, 18:5841 (R;US)
The role of the observational approach in RI planning: WAG 5 case study, 18:5127 (R;US)

SOLIDS
Interaction of low-energy electrons and positrons with condensed matter: Stopping powers and inelastic mean free paths from optical data, 18:7119 (RA;US)
Stopping power theory in inhomogeneous many electron systems, 18:7038 (RA;US)

SOLVENTS
Dual cure solventless coating process: Phase 2, Final report, 18:5815 (R;US)
Investigations of the effects of isotopic substitution and pressure of miscibility in polymer-polymer and polymer-solvent systems: Technical progress report, March 1991–March 1992, 18:6136 (R;US)

SOOT
Diesel exhaust particulates - formation and measurement, 18:5886 (IA;DE;In German)
Inhalation experiments in animals to elucidate the tumour-promoting potential of exhaust gases of diesel engines and two test dusts, 18:6714 (IA;DE;In German)
Preparation and analysis of a diesel exhaust particulate extract for the determination of a toxicity profile, 18:6142 (IA;DE;In German)
Separation of diesel soot particles with a combination of an agglomerator and a centrifugal separator, 18:5896 (RA;DE;In German)

SOUTH CAROLINA
Hydrogeologic investigation and establishment of a permanent multi- observational well network in Aiken, Allendale, and Barnwell counties, South Carolina: Phase 5, 18:6615 (R;US)

SOUTHEAST REGION

SPRUCES
Air Pollution
Biometric results of multiparameter studies with varying supply of ozone, carbon dioxide, potassium and water in young spruces in the exposure chambers of GSF, 18:6758 (RA;DE;In German)
Deposition, conversion and effect of air pollutants in mountain forest ecosystems of the Alpine region. Concept of research in the Calcareous Alps (Wank/Kramer near Garmisch-Partenkirchen), a main area of research of PBWU, 18:6742 (RA;DE;In German)
Growth and element content of fine roots of spruces on soils in the calcareous Northern Alps (Wank), 18:6752 (RA;DE;In German)
Reduction of stomatal control capacity by air pollutants, 18:6746 (RA;DE;In German)
Biological Adaptation
Detoxification of peroxides in the needles of spruces at the research area 'Wank' in the Bavarian Alps, 18:6747 (RA;DE;In German)
Biological Stress
Comparative gas exchange measurements on spruce under clean air respectively site air for qualitative establishment of primary damage due to air pollutants. Final report, 18:6654 (I;DE;In German)
Carbon Dioxide Fixation
Mineral nutrition and acute chlorosis in spruces, 18:6757 (RA;DE;In German)
Chemical Analysis
Element content in spruces at various altitudes in the area of the Bavarian Alps, 18:6750 (RA;DE;In German)
Chlorosis
Mineral nutrition and acute chlorosis in spruces, 18:6757 (RA;DE;In German)
Detoxification
Uptake and detoxification of chlorinated hydrocarbons by the needles of spruces, 18:6748 (RA;DE;In German)
Hydrogen Peroxide
Detoxification of peroxides in the needles of spruces at the research area 'Wank' in the Bavarian Alps, 18:6747 (RA;DE;In German)
Isotope Ratio
Natural C- and N-isotope ratios in different compartments of damaged and healthy spruce forests, 18:6753 (RA;DE;In German)
Land Pollution
Element content in spruces at various altitudes in the area of the Bavarian Alps, 18:6750 (RA;DE;In German)

Leaves
Deposition, conversion and effect of air pollutants in mountain forest ecosystems of the Alpine region. Concept of research in the Calcareous Alps (Wank/Kramer near Garmisch-Partenkirchen), a main area of research of PBWU, 18:6742 (RA;DE;In German)
Morphological Changes
Biometric results of multiparameter studies with varying supply of ozone, carbon dioxide, potassium and water in young spruces in the exposure chambers of GSF, 18:6758 (RA;DE;In German)
Multi-Parameter Analysis
Biometric results of multiparameter studies with varying supply of ozone, carbon dioxide, potassium and water in young spruces in the exposure chambers of GSF, 18:6758 (RA;DE;In German)
Nutrients
Element content in spruces at various altitudes in the area of the Bavarian Alps, 18:6750 (RA;DE;In German)
Nutritional Deficiency
Mineral nutrition and acute chlorosis in spruces, 18:6757 (RA;DE;In German)
Ozone
Detoxification of peroxides in the needles of spruces at the research area 'Wank' in the Bavarian Alps, 18:6747 (RA;DE;In German)
Roots
Growth and element content of fine roots of spruces on soils in the calcareous Northern Alps (Wank), 18:6752 (RA;DE;In German)
Soils
Dynamics of water and nutrients in soils of the 'Wank' (Bavarian Alps), 18:6751 (RA;DE;In German)
Water Use
Reduction of stomatal control capacity by air pollutants, 18:6746 (RA;DE;In German)
Xenobiotics
Uptake and detoxification of chlorinated hydrocarbons by the needles of spruces, 18:6743 (RA;DE;In German)

SQUID DEVICES
Bicrystal YBCO dc squids with low noise, 18:7143 (R;US)
Measurement by SQUID, 18:7141 (IA;JP;In Japanese)
Principle of SQUID, 18:7140 (IA;JP;In Japanese)
SQUID. Part 2.: Application of SQUID, 18:6262 (IA;JP;In Japanese)

STACKS
Wind induced vibration of a stack, 18:6199 (R;US)

STAINLESS STEEL-17-4PH
Gating geometry studies of thin-walled 17-4PH investment castings, 18:5982 (R;US)

STAINLESS STEEL-18-4-1
See STAINLESS STEELS

STAINLESS STEEL-19-9DL
See STAINLESS STEELS

STAINLESS STEEL-304
Aqueous stress corrosion of candidate austenitic steels for ITER structural applications, 18:7359 (RA;US)
Aqueous stress corrosion of structural materials, 18:7281 (RA;US)
Characterization of radiation-induced segregation in austenitic stainless steels using analytical electron microscopy and scanning Auger microprobe techniques, 18:7360 (RA;US)
Crack initiation (J-Δa curves) in liquid sodium on type 304 SS after previous creep damage, 18:5963 (RA;DE)
Embrittlement studies in austenitic stainless steels: FY89, Annual progress report, October 1988–September 1989 and CY89 third quarter report, 18:5943 (R;US)
Helium bubble distributions in reactor tank repair specimens: Part 1, 18:5603 (R;US)
Stress corrosion cracking susceptibility of irradiated Type 304 stainless steels, 18:5917 (R;US)
Stress corrosion of type 304 stainless steel in molten NaOH/Ha mixtures, 18:5962 (RA;DE)

STAINLESS STEEL-304L
Irradiation creep and swelling of annealed type 304L stainless steel at ~390C and high neutron fluence, 18:7266 (RA;US)
Vacuum deposition of copper on Type 304L stainless steel, 18:5997 (R;US)

STAINLESS STEEL-310
X-ray examination of Type 310S stainless steel during its oxidation in air at 900°C, 18:5931 (R;US)

STAINLESS STEEL-316
Analysis of creep data from MOTA irradiation of 20% cold worked 316 stainless steel, 18:7351 (RA;US)
Aqueous stress corrosion of candidate austenitic steels for ITER structural applications, 18:7359 (RA;US)
Assessment of H-induced crack growth of type 316 SS at ITER conditions, 18:7358 (RA;US)
Cavity microstructure and kinetics during GTA welding of helium containing stainless steel, 18:7271 (RA;US)
Determination of the creep compliance and creep swelling coupling coefficient for neutron irradiated titanium-modified stainless steels at ~ 400C, 18:7314 (RA;US)
Embrittlement studies in austenitic stainless steels: FY89, Annual progress report, October 1988–September 1989 and CY89 third quarter report, 18:5943 (R;US)
Implications of neutron spectrum and flux differences on fission-fusion correlations at high neutron fluence, 18:7256 (RA;US)
Interaction of irradiation creep and swelling in the creep disappearance regime, 18:7350 (RA;US)
Irradiation behavior of bonded structures: impact of stress-enhanced swelling on irradiation creep and elastic properties, 18:7340 (RA;US)
Low-temperature tensile behavior of irradiated austenitic stainless steels, 18:7309 (RA;US)
Miniaturized bending fatigue specimen development, 18:7251 (RA;US)
Slow strain rate tensile testing of fusion spectrally-tailored type 316 material irradiated between 60 and 400C in oxygenated, high-purity water environments, 18:7320 (RA;US)
Tensile property changes of metals and irradiated to low doses with fission, fusion and spallation neutrons, 18:7341 (RA;US)
The complex role of phosphorus in the neutron-induced swelling of titanium-modified austenitic stainless steels, 18:7311 (RA;US)
The strong influence of temper annealing conditions on the neutron-induced swelling of cold worked austenitic steels, 18:7312 (RA;US)
Tritium permeation scoping experiments: LWR Tritium Target Development Program, 18:5597 (R;US)

STAINLESS STEEL-316L
Aqueous stress corrosion of structural materials, 18:7281 (RA;US)
Fracture mechanics and full scale pipe break testing for DOE's New Production Reactor-Heavy Water Reactor, 18:5420 (R;US)

TITANIUM BASE ALLOYS
The behavior of intermetallic compounds at large plastic strains, 18:5972 (R;US)

TITANIUM CARBIDES
Adhesive strength, intrinsic stress and corrosion of mixed layers. Partial report, 18:6051 (I;DE;In German)
Strain measurement in individual phases of an Al/TiC composite during mechanical loading, 18:6057 (R;US)

TITANIUM HYDRIDES
HREM study of crystallography of titanium and titanium hydride thin films, 18:6085 (R;AU)

TITANIUM IONS
Electron impact excitation cross section measurements of highly charged heliumlike and lithiumlike ions, 18:7071 (R;US)

TITANIUM NITRIDES
Adhesive strength, intrinsic stress and corrosion of mixed layers. Partial report, 18:6051 (I;DE;In German)
Carbon diffusion in uncoated and titanium nitride coated iron substrates during microwave plasma assisted chemical vapor deposition of diamond, 18:5994 (R;AU)

TITANIUM OXIDES
X-ray diffraction study of shock-modified tetragonal phases of SnO_2 and MnO_2, 18:6027 (R;US)

TLD (DOSEMETERS)
See THERMOLUMINESCENT DOSEMETERS

TLD (DOSIMETRY)
See THERMOLUMINESCENT DOSIMETRY

TLD SYSTEMS
See THERMOLUMINESCENT DOSEMETERS

TNT
Growth and defects of explosives crystals, 18:6458 (R;US)

TOBACCO SMOKES
Environmental tobacco smoke, 18:5790 (R;US)

TOKAMAK DEVICES
See also DOUBLET-3 DEVICE
ITER TOKAMAK
JET TOKAMAK
JFT-2M TOKAMAK
JIPPT-2 DEVICE

VERSATOR TOKAMAK

Alfven Waves
Effect of alpha particles on Toroidal Alfven Eigenmodes, 18:7165 (R;US)
Kinetic theory of toroidicity and ellipticity-induced Alfven eigenmodes, 18:7164 (R;US)

Auxiliary Heating
The CQL3D Fokker-Planck code, 18:7167 (R;US)

Bootstrap Current
Bootstrap current profiles and scaling in large aspect ratio tokamaks, 18:7193 (R;JP)

Charged-Particle Transport
Alpha effects on TAE modes and alpha transport, 18:7152 (R;US)

Computer Networks
Data-sharing protocol: A prototype implementation, 18:7412 (R;US)

Design
Equilibrium system analysis in a tokamak ignition experiment: Final report, 18:7374 (R;US)

Disturbances
Destruction of drift surfaces in tokamaks through small magnetic field perturbations, 18:7195 (RA;GB)

H-Mode Plasma Confinement
Self-regulated shear flow turbulence in confined plasmas: Basic concepts and potential applications to the L → H transition, 18:7151 (R;US)

High-Frequency Heating
Low frequency rf current drive: Annual progress report, 18:7376 (R;US)

Icr Heating
Fusion Plasma Theory: Task 3, Auxiliary radiofrequency heating of tokamaks: Annual report, November 16, 1991–November 15, 1992, 18:7159 (R;US)
On a mechanism of antenna phasing effect on impurity production during ICRF plasma heating, 18:7206 (R;UA)

Magnetic Field Configurations
Magnetic reconnection at stressed x-type neutral points, 18:7379 (R;US)
Poloidal magnetic field profile measurements on the microwave tokamak experiment using far-infrared polarimetry, 18:7247 (R;US)

Magnetic Fields
Destruction of drift surfaces in tokamaks through small magnetic field perturbations, 18:7195 (RA;GB)

Neoclassical Transport Theory
Moment approach to fast ion neoclassical transport and viscous forces, 18:7194 (R;JP)

Pellet Injection
Application of railgun principle to high-velocity hydrogen pellet injection for magnetic fusion reactor fueling: Progress report, August 16, 1991–September 30, 1992, 18:7375 (R;US)

Plasma Disruption
A model of major disruption in tokamaks, 18:7229 (R;JP)

Plasma Instability
Alpha effects on TAE modes and alpha transport, 18:7152 (R;US)

Plasma Sheath
Salient issues of edge physics pertaining to loss of confinement: A resistive MHD analysis: Technical progress report, FY91, 18:7161 (R;US)
Salient issues of edge physics pertaining to loss of confinement: A resistive MHD analysis: Final report, 18:7160 (R;US)

Plasma Simulation
Simulation models for tokamak plasmas, 18:7245 (R;US)

Rotating Plasma
Poloidal rotation, density asymmetries and momentum confinement in tokamak experiments, 18:7171 (R;US)

Turbulence
Thermally driven turbulence and transport in a sheared system, 18:7162 (R;US)

Wall Effects
Review of high Z materials for PSI applications, 18:7407 (R;JP)

TOKAMAK FUSION TEST REACTOR
See TFTR TOKAMAK

TOKYO INS CYCLOTRON
Research and education by SF cyclotron facility, 18:6280 (R;JP;In Japanese)

TOOLS (EDUCATIONAL)
See EDUCATIONAL TOOLS

TOP PARTICLES
CDF measurements of the W mass and search for the top, 18:6953 (R;US)

TORSATRON STELLARATORS
See also ATF TORSATRON
Study on plasma equilibrium currents in 1-3 torsatron, 18:7204 (R;UA;In Russian)
Transfer processes in stellarators at the regime of frequent particle collisions, 18:7205 (R;UA;In Russian)

TOTAL-ABSORPTION SPECTROMETERS

TRANSPORT (RADIATION)
See RADIATION TRANSPORT

TRANSPORT REGULATIONS
Konrad transport study: Safety analysis of the transportation of radioactive waste to the Konrad waste disposal site, 18:5144 (R;DE)

TRANSURANIUM WASTES
See ALPHA-BEARING WASTES

TREATIES
Verification Technologies, first/second quarters 1992, 18:5906 (R;US)

TREES
See also BEECH TREES
FIRS
OAKS
PINES
SPRUCES
Airborne acid pollution of beech and spruce stands in Hungary (Sopron) and Hessen (Witzenhausen), 18:6490 (RA;DE;In German)
Reactions of trees to air pollutants, 18:6735 (RA;DE)

TRIGA-3-SALAZAR REACTOR
Terminal project heat convection in thin cylinders., 18:5592 (I;MX;In Spanish)

TRIGA-BRAZIL REACTOR
Twenty years of Triga Mark I reactor use, 18:5491 (R;BR;In Portuguese)

TRIGGER CIRCUITS
3D-Flow processor for a calorimeter programmable Level-1 trigger, 18:6436 (R;US)
A study of the Intel ETANN VLSI neural network for an electron isolation trigger, 18:6399 (R;US)
The Soft X-ray real time fast trigger system, 18:7203 (R;GB)

TRINITROTOLUENE
See TNT

TRIPLET PARTICLES
See QUARKS

TRITIATED COMPOUNDS
See TRITIUM COMPOUNDS

TRITIUM
Analysis of in-pile tritium release experiments, 18:7322 (RA;US)
Continuous tritium effluent water monitor at the Savannah River Site, 18:5600 (R;US)
Desorption characteristics of the Li_2O system, 18:7321 (RA;US)

Development of a reference method and sampling system for continuous monitoring of environmental HT and HTO concentration in the air: Final report for the period 15 December 1988 - 14 December 1990, 18:6498 (R;XA)
Modeling of tritium behavior in ceramic breeder materials, 18:7286 (RA;US)
Results of dose calculations for NET accidental and normal operation releases of tritium and activation products, 18:7397 (R;DE)
Safety analysis report – Packages LP-50 tritium package (Packaging of fissile and other radioactive materials): Final report: Revision 2, 18:6207 (R;US)
Searches for massive neutrinos in nuclear beta decay, 18:6958 (R;US)
Tritium, 18:5229 (R;DE;In German)
Tritium permeation scoping experiments: LWR Tritium Target Development Program, 18:5597 (R;US)
Tritium release from irradiated beryllium at elevated temperatures, 18:7289 (RA;US)
Tritium technology development under 5-year US-Japan collaboration at TSTA, 18:7399 (R;US)

TRITIUM COMPOUNDS
Nuclear spin polarization, 18:7059 (RA;US)

TROMBE WALLS
Solar walls in Vibekevang - energy retrofitting, 18:5294 (R;DK;In Danish)
Solar walls: Status and plan for research, development and demonstration projects, 18:5291 (R;DK;In Danish)

TRONA
Production of hydrogen and coproducts from coal, 18:5231 (R;US)

TRU WASTES
See ALPHA-BEARING WASTES

TRUCKS
Technical comparison between Hythane, GNG and gasoline fueled vehicles, 18:5898 (R;US)

TRX-1
See REVERSE-FIELD PINCH

TRYPSIN
Laue diffraction as a tool in dynamic studies: Hydrolysis of a transiently stable intermediate in catalysis by trypsin, 18:6123 (R;US)

TSCHEBYSCHEFF APPROXIMATION
See POLYNOMIALS

TSL PROCESS
Advanced Coal Liquefaction Research and Development Facility, Wilsonville, Alabama: Run 262 with Black Thunder subbituminous coal: Technical progress report, 18:4887 (R;US)
Highly dispersed catalysts for coal liquefaction: Quarterly report No. 4, May 23, 1992–August 22, 1992, 18:4890 (R;US)
Process and analytical studies of enhanced low severity coprocessing using selective coal pretreatment: Final technical report, 18:4885 (R;US)

TSR-1 REACTOR
Where have the neutrons gone: A history of the Tower Shielding Facility, 18:5493 (R;US)

TSR-2 REACTOR
Where have the neutrons gone: A history of the Tower Shielding Facility, 18:5493 (R;US)

TUBES
Flow-induced vibration: 1992, 18:5453 (R;US)

TUBES (CONDUITS)
See PIPES

TUMORS
See NEOPLASMS

TUNGSTATES
New pathways to tungsten and molybdenum oxides, nitrides and azides, 18:6018 (R;US)

TUNGSTEN
The morphology of collision cascades as a function of recoil energy, 18:7255 (RA;US)
The neutralization process of highly charged ions near a metal surface, 18:7111 (RA;US)

TUNGSTEN ALLOYS
Microstructural examination of simple vanadium alloys irradiated in the FFTF/MOTA, 18:7274 (RA;US)
Target penetrator interaction: 70 volume percent tungsten-30 volume percent uranium penetrator material, 18:5967 (R;US)

TUNGSTEN COMPLEXES
New pathways to tungsten and molybdenum oxides, nitrides and azides, 18:6018 (R;US)

TUNGSTEN NITRIDES
New pathways to tungsten and molybdenum oxides, nitrides and azides, 18:6018 (R;US)

TURBINE BLADES
Aerodynamics
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of turbine cascade, 18:5871 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental vertification of turbine cascades, 18:5883 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental verification of turbine cascades, 18:5881 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Comparison and application of cascade aerodynamic analytic methods, 18:5880 (IA;JP;In Japanese)
Examples of application of gas turbine reltated numerical analysis at the current stage and its problems.: Aerodynamic design system for turbine cascades, 18:5882 (IA;JP;In Japanese)

Alignment
Applications of gas turbine related numerical analyses and their problems.: Aerodynamic analysis of turbine cascade, 18:5871 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental vertification of turbine cascades, 18:5883 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Accuracy improvement in cascade flow analyzing methods, 18:5879 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental verification of turbine cascades, 18:5881 (IA;JP;In Japanese)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Comparison and application of cascade aerodynamic analytic methods, 18:5880 (IA;JP;In Japanese)

Clearance
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Numerical analysis of blade tip clearance flow, 18:5877 (IA;JP;In Japanese)

Cooling
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Analysis of heat transfer in gas turbine cooling blades, 18:5878 (IA;JP;In Japanese)

Corrosion
Advanced turbine design for coal-fueled engines: Topical report, Task 1.6, Task 1.7, 18:5861 (R;US)

Dynamic Loads
Dynamics of a two-bladed teetering rotor, 18:5330 (R;DK)

Energy Losses
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental vertification of turbine cascades, 18:5883 (IA;JP;In Japanese)

Fluid Mechanics
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Accuracy improvement in cascade flow analyzing methods, 18:5879 (IA;JP;In Japanese)

Heat Transfer
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Analysis of heat transfer in gas turbine cooling blades, 18:5878 (IA;JP;In Japanese)
Materials Testing
Fatigue of fiberglass wind turbine blade materials, 18:6069 (R;US)
Morphology
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Aerodynamic analysis and experimental vertification of turbine cascades, 18:5883 (IA;JP;In Japanese)
Numerical Analysis
Examples of application of gas turbine reltated numerical analysis at the current stage and its problems.: Aerodynamic design system for turbine cascades, 18:5882 (IA;JP;In Japanese)
Unsteady Flow
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Analysis of non-steady flow in turbine cascade, 18:5874 (IA;JP;In Japanese)
Wind Loads
Fatigue loads on wind turbine blades in a wind farm, 18:5328 (R;SE)

TURBOGENERATORS
Torsional interaction between HVDC link and large turbine-generators, 18:5668 (RA;FI)

TURBULENT FLOW
CAST - a finite volume method for predicting two-dimensional flow and heat transfer phenomena, 18:6238 (R;DE)
Examples of application of gas turbine related numerical analysis at the current stage and its problems.: Cascade numerical analysis and turbulence model, 18:5875 (IA;JP;In Japanese)
Experimental and numerical investigation of passive scalar dispersal in bounded turbulent shear flows, 18:6231 (R;US)
Tests of random flight and closure models in predicting turbulent scalar transport, 18:6232 (R;US)

TWO-BODY PROBLEM
Unexpected strong attraction in the presence of continuum bound state, 18:6805 (R;BR)

TWO-PHASE FLOW
Analysis of liquid-solids suspension velocities and concentrations obtained by NMR imaging, 18:6230 (R;US)
Internal structure and interfacial area in two-phase flow systems, 18:6233 (R;US)
Review of mathematical and physical basis of two-phase flow modelling, 18:6240 (R;DE)

TYPE-II SUPERCONDUCTORS
Vacuum structure of pure gauge theories on the lattice, 18:6863 (R;US)

TYPE-III SUPERCONDUCTORS

Activity Levels
Radioactivity levels in the process streams of Uranium Metal Plant at Trombay, 18:5089 (IA;IN)
Aerial Surveying
Evaluation of favourable structural features for uranium airborne geophysical surveys over parts of Madhya Pradesh, India, 18:5032 (IA;IN)
Bioadsorbents
Biosorption of uranium by yeast, 18:5043 (IA;IN)
Dimers
Molecular orbital studies of the bonding in heavy element organometallics: Progress report, 18:6126 (R;US)
Exploration
Hydrogeochemical exploration for uranium : a case study from the Cuddapah basin, Andhra Pradesh, 18:5035 (IA;IN)
Integrated geophysical investigations for uranium : a case study from Jamiri, West Kameng district, Arunachal Pradesh, 18:5033 (IA;IN)
Structure as a guide for uranium exploration in the Turamdih-Mohuldih area, Singhbhum district, Bihar, 18:5030 (IA;IN)
Extrusion
Fuels Preparation Department monthly report, July 1957, 18:5073 (R;US)
Geochemical Surveys
Hydrogeochemical exploration for uranium : a case study from the Cuddapah basin, Andhra Pradesh, 18:5035 (IA;IN)

Geophysical Surveys
Evaluation of favourable structural features for uranium airborne geophysical surveys over parts of Madhya Pradesh, India, 18:5032 (IA;IN)
Granites
The International intraval project. Phase 1 case 1b. Uranium migration in crystalline rock; borecore pressure infiltration experiments, 18:5152 (R;XN)
India
Development of mining at Jaduguda, 18:5037 (IA;IN)
Uranium mining in India - past, present and future, 18:5041 (IA;IN)
Ion Exchange
Recovery of uranium from sea water - a laboratory study, 18:5053 (IA;IN)
Isotope Separation
PC based uranium enrichment analyser, 18:5060 (IA;IN)
Laser Isotope Separation
The Atomic Vapor Laser Isotope Separation Program, 18:5064 (R;US)
Leaching
Recovery of uranium by direct low acid leaching from copper concentrator tailing, 18:5046 (IA;IN)
Membrane Transport
Uranyl ion transport across tri-n-butyl phosphate/n-dodecane liquid membranes, 18:6147 (IA;IN)
Mining
Development of mining at Jaduguda, 18:5037 (IA;IN)
Uranium mining in India - past, present and future, 18:5041 (IA;IN)
Occupational Exposure
Radiological and conventional safety aspects of machining operations of uranium ingots, 18:6686 (IA;IN)
On-Line Measurement Systems
Development of flow injection analysis technique for uranium estimation, 18:6107 (IA;IN)
Ore Enrichment
Recovery of uranium mineral concentrate from copper tailings, 18:5038 (IA;IN)
Ore Processing
Grand Junction Projects Office site environmental report for calendar year 1991, 18:5045 (R;US)
Phosphate Rocks
Uranium recovery from phosphoric acid, 18:5049 (IA;IN)
Polarography
Voltammetric studies of uranium (VI) reduction, 18:6146 (IA;IN)
Precipitation
Precipitation of ammonium diuranate : a study, 18:5052 (IA;IN)
Production
Design criteria, Part 1: B Plant reactivation, 4X Program, 18:5069 (R;US)
Improvements in process technology for uranium metal production, 18:5087 (IA;IN)
Quality assurance during uranium metal production at U.M.P., 18:5059 (IA;IN)
Prospecting
Prospecting for uranium in carbonate rocks of the Vempalle formation, Cuddapah basin, Andhra Pradesh, 18:5031 (IA;IN)
Purex Process
A continuous reactor system for precipitation of uranium from uranyl solution, 18:5101 (IA;IN)
Development of flow injection analysis technique for uranium estimation, 18:6107 (IA;IN)
Quality Assurance
Quality assurance during uranium metal production at U.M.P., 18:5059 (IA;IN)
Quantitative Chemical Analysis
Determination of uranium in sea water by adsorptive differential pulse voltametry, 18:6110 (IA;IN)
Standardization of a D.C. arc carrier-distillation procedure on a direct reading spectrometer for the determination of B, Cd etc., in nuclear grade uranium, 18:6108 (IA;IN)
Radionuclide Migration
The International intraval project. Phase 1 case 1b. Uranium migration in crystalline rock; borecore pressure infiltration experiments, 18:5152 (R;XN)
Reduction
Voltammetric studies of uranium (VI) reduction, 18:6146 (IA;IN)
Refining
Operating experience in the refining of uranium by solvent extraction using mixer-settler, 18:5051 (IA;IN)
Slags
Future trends in the processing of uranium slag generated during production of uranium metal, 18:5057 (IA;IN)
Solvent Extraction
Operating experience in the refining of uranium by solvent extraction using mixer-settler, 18:5051 (IA;IN)
Preparation of nuclear grade uranium oxide from Jaduguda leach liquor, 18:5048 (IA;IN)
Uranium recovery from phosphoric acid, 18:5049 (IA;IN)
Voltametry
Determination of uranium in sea water by adsorptive differential pulse voltametry, 18:6110 (IA;IN)

URANIUM 234
Monticello Millsite environmental report for calendar year 1991, 18:5186 (R;US)

URANIUM 238
Experimental study of ^{238}U Doppler reactivity worth in FCA XVI-1 and XVI-2 cores, 18:5596 (R;JP;In Japanese)
Monticello Millsite environmental report for calendar year 1991, 18:5186 (R;US)
Results of the radiological survey at 31 Schlosser Drive, Rochelle Park, New Jersey (RJ003), 18:5062 (R;US)
Results of the radiological survey at 37 Schlosser Drive, Rochelle Park, New Jersey (RJ002), 18:5063 (R;US)
The generalized collective model, 18:6967 (R;DE;In German)

Bell Pole CROW pilot test results and evaluation, 18:6567 (R;US)

WOOD WASTES
Long term storage of mixed bark-shavings fuel, 18:5255 (R;SE;In Swedish)

WOOD-FUEL POWER PLANTS
Plastic wastes as support fuel, 18:5351 (R;FI;In Finnish)
Solar village Indonesia. Biotechnologies. Final report, 18:5240 (I;DE)
Storage, transport and firing of sliced straw: Preliminary project, 18:5254 (R;DK;In Danish)

WORKERS
See PERSONNEL

WWER TYPE REACTORS
See also GREIFSWALD-5 REACTOR
Advanced properties of structural materials for nuclear equipment in Eastern countries, 18:5392 (RA;XA)
Characterization of material properties for assessment of integrity and application of leak-before-break technology on the primary piping of APWRs, 18:5398 (RA;XA)
Materials in WWER reactor vessels, 18:5393 (RA;XA)

X

X RADIATION
See also SOFT X RADIATION
Experimental demonstration of high resolution three-dimensional x-ray holography, 18:6442 (R;US)

X-RASERS
See X-RAY LASERS

X-RAY DIFFRACTION
Diffraction peaks in x-ray spectroscopy: Friend or foe?, 18:6115 (R;US)
X-RAY DIFFRACTOMETERS
Microcomputer based acquisition system for the Philips PW1306/00 powder diffractometer, 18:7514 (R;AU)
Synchrotron and laboratory studies utilizing a new powder diffraction technique, 18:6090 (R;US)
X-RAY FLUORESCENCE ANALYSIS
Diffraction peaks in x-ray spectroscopy: Friend or foe?, 18:6115 (R;US)
X-RAY LASERS
Measurement of the spatial coherence of a soft x-ray laser, 18:6366 (R;AU)
Molecular design concept for x-ray laser research: Progress report, 15 December–30 September 1992, 18:6261 (R;US)
X-RAY SOURCES
171 ROYAL DECREE 1891/1991 of 30 December 1991 on the installation and use of X-ray equipment for the purposes of medical diagnosis, 18:5215 (R;ES;In Spanish)
The Los Alamos Trailmaster Program: Status and plans, 18:5227 (R;US)
X-RAY SPECTROMETERS
Superconducting tunnel junction x-ray detectors with niobium absorbers and aluminum quasiparticle traps: Volume 1743, 18:6853 (R;US)
X-RAY SPECTROSCOPY
An attempt to reduce radioactivity for energy-dispersive x-ray analysis, 18:7294 (RA;US)
Diffraction peaks in x-ray spectroscopy: Friend or foe?, 18:6115 (R;US)
XANTHUM GUM
Xanthane production in the bubble column bioreactor, 18:5242 (I;DE;In German)
XENON
Satellite structure of the xenon valence shell by electron momentum spectroscopy, 18:6965 (R;AU)
XENON 131 TARGET
Study of secondary neutron production in π^--Xe-interactions at 3.5 GeV/c, 18:7012 (R;RU;In Russian)
XENON 135
Stability limits against flux oscillations due the presence of xenon 135, 18:5450 (I;BR;In Portuguese)
XENON 136 REACTIONS
Development of a fragment detector system for the study of peripheral collisions at high beam energies, 18:6403 (R;DE;In German)

Y

Y*RESONANCES
See BARYONS
Y-12 PLANT
Making old buildings meet new standards, 18:6226 (R;US)
YAYOI REACTOR
Annual report of Nuclear Engineering Research Laboratory, University of Tokyo in fiscal 1991, 18:7433 (R;JP;In Japanese)
Report of the research results with University of Tokyo, Nuclear Engineering Research Laboratory's Facilities in fiscal 1991, 18:7434 (R;JP;In Japanese)
YELLOW CAKE
See URANIUM OXIDES U3O8
YTTERBIUM
VUV spectroscopy of ytterbium using laser and synchrotron radiation, 18:7055 (R;DE;In German)
YTTRIUM
Application of high-resolution laser spectroscopy to the monitoring of vapor-phase metals, 18:5204 (R;US)
Separation and purification of gadolinium and others rare earths, and yttrium, 18:6091 (R;BR;In Portuguese)
YTTRIUM ALUMINIUM GARNETS
See ALUMINIUM OXIDES
YTTRIUM OXIDES
Effects in thin films of the high-T_c compounds REBaCuO induced by ion irradiation, 18:6020 (R;DE;In German)
Magnetic and transports properties of some high-temperature superconductors, 18:6028 (RA;US)
Oxygen configurations and their effect on charge transfer in $YBa_2Cu_3O_z$, 18:6025 (R;US)
Photoelectron studies of in situ cleaved crystals of $YBa_2Cu_3O_7$, 18:6163 (RA;US)
Radiation damage for high-temperature superconductors, 18:7254 (RA;US)
Some basic phenomena and their importance in relation to techniques for sputter- and vapor-deposition of high temperature superconducting thin films, 18:6003 (RA;US)
The valence bands and Fermiology of untwinned, single-crystal $YBa_2Cu_3O_{6.9}$, 18:6164 (RA;US)
YUCCA MOUNTAIN
RE/SPEC Inc. technical support to the Repository Technology Program: Summary of activities for September 1, 1988–June 30, 1992, 18:5128 (R;US)
Yucca Mountain Site characterization project bibliography, January–June 1992: An Update: Supplement 3, Addendum 1, 18:5134 (R;US)

Z

Z NEUTRAL BOSONS
QCD studies of hadronic decays of Z^0 bosons by SLD, 18:6947 (R;US)
ZEA MAYS
See MAIZE
ZEOLITES
See also MORDENITE
Aluminum coordination and active sites on aluminas, Y zeolites and pillared silicates: Progress report, January 31, 1992–January 31, 1993, 18:6047 (R;US)
Chemical interactions in multimetal/zeolite catalysts: Progress report, January 7, 1991–January 6, 1992, 18:6128 (R;US)
Formation and chemical characteristics of coke deposits in typical hydrocarbon reactions on acid monofunctional zeolite catalysts. Final report, 18:6141 (I;DE;In German)
Photoinduced electron transfer reactions in zeolite cages: Progress report, January 15, 1990–August 1, 1992, 18:6169 (R;US)
Selective catalytic reduction of nitrogen monoxide with ammonia under periodically changing reaction conditions using a zeolite catalyst, 18:5374 (RA;DE;In German)
ZINC
Preliminary tests for the testing phase of the demonstration plant for low-waste zinc electroplating in Manila. Final report, 18:5947 (I;DE;In German)
ZINC ALLOYS
First-principles approach to alloy phase stability, 18:6156 (RA;US)
ZINC COMPOUNDS
See also ZINC OXIDES
Determination of the heavy metal release from sediments by nitrilo-triacetic acid, 18:6603 (IA;DE;In German)
ZINC DISTILLATION PROCESS
See PYROCHEMICAL REPROCESSING
ZINC OXIDES
Methane oxidation over dual redox catalysts: Final report, 18:6138 (R;US)
ZIRCONIUM
Zirconium determination in refractories (gravimetric method), 18:6106 (I;BR)
ZIRCONIUM ALLOYS
See also VANSTAR 7
Improved PWR fuel cladding, 18:5397 (RA;XA)
Reusable molds for casting U-Zr alloys, 18:5916 (R;US)

Contract Number Index

Numbers assigned to DOE contracts announced in documents in this publication are listed. Contract numbers are sorted alphanumerically and list the primary corporate author of the document cited, the citation number, and the report number or other document identification.

Contract No.	Abstract No.	Report No.
AC01-88FE61660	**Gilbert/Commonwealth, Inc., Reading, PA (United States)**	
	18:5338	DOE/FE/61660–93/C0093

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

Codes Used on Index Lines

Following the citation numbers in the Corporate Author, Personal Author, and Subject Indexes, codes are used to designate the type of document, country of publication, and language of the document, e.g., (R;SU;In Russian). The language designator does not appear if the document is published in English.

ORDER FORM

DOE and DOE Contractors: Fill in Parts I, II, and IV. **Others:** Fill in Parts I, III, and IV. Mark appropriate blanks in Part IV to indicate quantity and form (microfiche or paper copy).

I. SHIPPING AND PAYMENT INFORMATION

Ordering Address

Name _____ Telephone _____

Address _____

City _____ State _____ Zip _____

Shipping Address (if different from above)

Name _____

Address _____

City _____ State _____ Zip _____

_____

SIGNATURE (Required to validate ALL orders)

II. OSTI ORDERS (DOE and DOE contractors can order from OSTI.)

☐ Charge OSTI deposit account no. _____

Mail orders to: U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831

III. NTIS ORDERS

☐ Charge NTIS deposit account no.

☐ Check/Money Order enclosed for $

☐ Charge to my ☐ American Express ☐ VISA ☐ Mastercard

_____ _____
Account Number **Card expiration date**

☐ Ship and Bill (see below for restrictions)

Employer identification number (9 digits) _ _–_ _ _ _ _ _ _

Purchase Order number _____

Phone number of billing office _____
(Required for Ship & Bill orders)

Ship & Bill service is restricted to North American business locations for an extra $7.50 per order (or per Custom Search). The business' employer identification number plus the phone number of the office paying the bill are required to process these requests. A late payment charge will be applied to billings more than 30 days overdue. Prepaying, using an NTIS Deposit Account or a charge account, speeds order processing. Be sure payment and order are sent together. Checks, payable to NTIS, must be in U.S. dollars.

Mail orders to: U.S. Department of Commerce
National Technical Information Service
5285 Port Royal Road
Springfield, VA 22161

IF NO METHOD OF PAYMENT IS INDICATED, YOUR ORDER WILL BE RETURNED TO YOU AS A PRICE QUOTE UNPROCESSED.

Federal Depository Library Program

As a result of an agreement between the U.S. Government Printing Office (GPO) and the Department of Energy, beginning in 1984 DOE reports with unlimited distribution are now included in the Federal Depository Library Program. The Regional Depository Libraries listed below receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. You may wish to ask your local library to contact a Regional Depository to help you locate specific publications, or you may contact the Regional Depository yourself. Do not send checks or orders to these libraries.
